

Julio Lucia is currently a professor (TU) of Financial Economics at the Universitat de València, Spain, where he has held an appointment since 1991. He has a Licenciatura degree (M.Sc. equivalent) in Economics and Management, and a Ph.D. in Financial Economics from the Universitat de València. He held postdoctoral research positions at the Universidad Carlos III de Madrid (1998), and the Anderson School of Management at UCLA (1999-2000).

He has published a number of referred articles in finance academic journals, and he has contributed to several books and conference proceedings. He has participated in research projects funded by the Fundación de Estudios Bursátiles y Financieros, the Universitat de València, the Fundación Generalitat Valenciana-Iberdrola, the Instituto Valenciano de Investigaciones Económicas, and the Ministerio de Ciencia y Tecnología of Spain. He has also been the recipient of a fellowship sponsored by the Conselleria de Cultura, Educació i Ciència of the Generalitat Valenciana to engage in collaborative research in the US. His current research interests include diverse issues in the areas of financial and commodity derivatives and asset pricing.

He currently teaches Financial Mathematics in undergraduate programs at the Facultad de Economía of the Universidad de Valencia, and Derivatives at the Master's program in Banking and Quantitative Finance that is jointly administered by Universidad de Castilla la Mancha, Universidad del País Vasco and Universidad de Valencia.
