VNIVERSITAT
E VALÈNCIA

Five centuries of knowledge

Founded in 1499 by the Valencian city juries, and acknowledged by the papal bull of Pope Alexander VI in 1501, the Universitat de València was initially dedicated to the study of Medicine, Humanities, Theology and Law.

Nowadays it is a modern European public University open to almost every branch of teaching, research and learning in:

- Humanities
- Basic Sciences and Technology
- Health Sciences
- Social Sciences
- Education

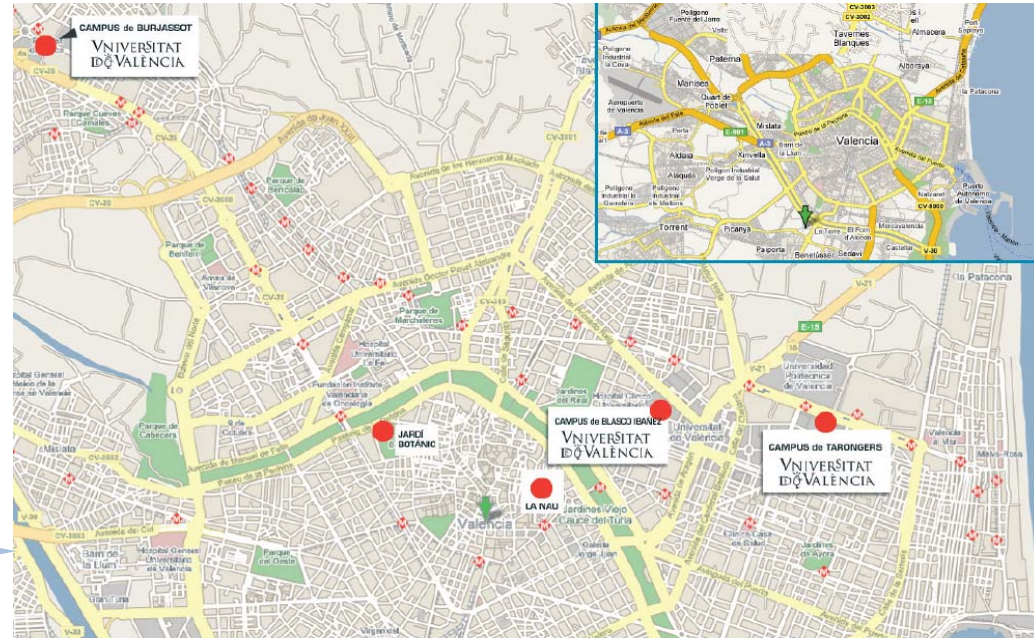

Location

- It is located in Valencia, the third largest city in Spain and the 21st within the EU in terms of population. The city was founded by the Romans in 137 BC.
- The UNIVERSITY has 3 main urban campuses and some other buildings and facilities around the city

Research

- The University has extensive leadership in research
- Annual research budget > 50 M€
- It is the 3rd or 4th in the Spanish university research system, according to various rankings
- Takes technology to the business market through Office of Research Results Transfer
- Develops patents, promotes spin-offs and encourages business creation

Research institutes

THE UNIVERSITY OF VALÈNCIA IS A PIONEER IN RESEARCH

The University of Valencia is ranked third or fourth in the Spanish university system with regard to research, according to different international rankings.

The University of Valencia is a pioneer in research with 960 research projects and 95 patents (between 1995 and 2005). In the last budget it dedicated 55 million euros to research including: scientific equipment, research grants, grants to conduct research in other centres, pre-and post doctoral research grants, guest professors, University of Valencia researchers and co-financed researchers from other organisations.

Research activity is focused on basic and applied fields and boasts a significant number of researchers and teachers in departments and university institutes.

Research at the University of Valencia benefits society and, in particular, businesses and public administrations through the Office of the Transfer of Research Results (OTRI). This office is responsible for facilitating and promoting collaboration between the world of university research and companies within their socioeconomic environment.

The University of Valencia develops other research activities such as its own publications, conferences, and national and international scientific meetings in different disciplines.

The journal *Métode* has already published more than 50 issues, and the University of Valencia research bulletin IDia has been added to the list of publications.

- Biodiversity and Evolutionary Biology Cavanilles
- Corpuscular Physics
- Creativity and Educational Innovations
- Criminology and Penal Science
- History of Medicine and Science, López Piñero
- Human resources psychology, organisational development and quality of working conditions
