

NAS-C1. Monday (06/07) 15:00-16:40

15:00. V.F. Prego. "Analysis of a strain gradient model with the Coleman-Gurtin thermal law"

15:25. A. García-Mascaraque. "A new reduced order method for parametric time-dependent PDEs"

15:50. R. Sáez. "Low storage Runge–Kutta methods for linear ordinary differential equations"

16:15. E. Aldana. "Numerical Analysis of a three-field formulation for a reverse osmosis model"
