

<b>Job Title</b>	Analyst	<b>Practice</b>	Life & PC
<b>Segment</b>	Risk and Financial Services	<b>Reporting to</b>	
<b>LOB</b>	Risk Consulting and Software	<b>Level</b>	11
<b>The Company</b>			
Towers Watson is a leading global professional services company that helps organisations improve performance through effective people, financial and risk management. With 14,000 associates around the world, we offer solutions in the areas of employee benefit programmes, talent and reward programmes, and risk and capital management.			
<b>The Business</b>			
Towers Watson's insurance consulting business helps clients improve business performance. We use our deep analytical skills to solve practical business problems, applying the latest techniques and software solutions to help clients measure and manage risk and capital, grow revenue and create competitive advantage.			
<b>The Role</b>			
As an Intern Analyst in RCS-Life&PC, you will work beside some of the industry's top consultants and, both, life and non-life companies.			
<p>You will have immediate exposure to real client assignments which will draw on your imagination and creativity as well as your ability to analyse data, draw conclusions and present results. These experiences will help build your technical knowledge and overall industry expertise while you benefit from one of the industry's most comprehensive actuarial training and development programs.</p> <p>Your main responsibilities will be as follows:</p>			
<b>People</b>			
<ul style="list-style-type: none"> <li>■ Build strong relationships internally and with client representatives</li> <li>■ Demonstrate natural ease and effectiveness when dealing with clients/colleagues at all levels</li> </ul>			
<b>Clients</b>			
<ul style="list-style-type: none"> <li>■ Partner with consultants to provide life actuarial support on client projects that help improve our clients' performance in areas related to their financial risk, product distribution and capital issues</li> <li>■ Help to design and implement advanced financial modelling approaches and systems</li> <li>■ Perform stochastic testing to help our clients assess their financial risks and potential rewards</li> <li>■ Leverage technical expertise for corporate restructuring and capital enhancement initiatives (securitizations, mergers &amp; acquisitions, etc.)</li> <li>■ Develop strategies to help our clients deal with regulatory changes, including the introduction of the Solvency II regime</li> <li>■ Help to create project plans and monitor progress to deadlines and budget</li> <li>■ Ensure appropriate and effective communication among team members and the client</li> <li>■ Increase efficiency within client teams by identifying ways to improve processes</li> </ul>			
<b>Excellence</b>			
<ul style="list-style-type: none"> <li>■ Develop professional expertise by progressing towards qualification as an actuary</li> <li>■ Deliver projects that meet or exceed client expectation</li> <li>■ Involvement in R&amp;D to develop and enhance future sales propositions and internal firm knowledge to maintain our leading edge in the market</li> </ul>			
<b>Financial</b>			
<ul style="list-style-type: none"> <li>■ Contribute to sales and marketing efforts by assisting in the drafting of proposals, presentations and pitches</li> <li>■ Meet billable hours targets</li> </ul>
