

GLASS SCIENCE IN ART AND CONSERVATION

II International Conference

March 5-7, 2008 Valencia -Spain

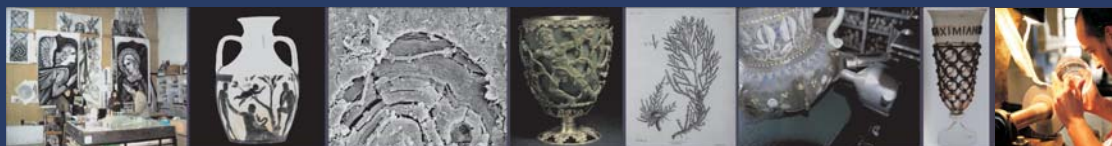

The second "Glass Science in Art and Conservation" congress is an international meeting that tries to involve the chemical, physical and biological sciences with art, archaeology and history of glass artefacts. GLASSAC congress will provide an opportunity to discuss practical problems of intervention facing conservators and it will examine significant developments in the science of glass that can show artists and the conservation community innovative possibilities

The glass exhibition:

THE LANGUAGE OF THE MATTER

Carlos Muñoz de Pablos: glassworking painter

will be located at the Cloister of the University historic Building, *La Nau*, during the month of March
