Aims	Helping experienced researchers at various career stages to acquire new research skills or undertake intersectoral experiences.	Encouraging top-class researchers moving from Third Countries to work on projects in Europe. Promoting mutually beneficial research cooperation.	Enabling European researchers to be trained and acquire new knowledge in a high-level research organisation in a Third Country.	Encouraging researchers to establish themselves in Europe or in an Associated Country.	Initial training of researchers in order to improve their skills, help them join established research teams and enhance their career prospects.	Promoting commercial and non-commercial partnerships through joint research projects. Exchange of skills and human resources. Cross-border cooperation.	Reinforcing international programmes and supporting new or existing regional and national programmes to provide for transnational mobility.	Assisting research organisations to set up or strengthen long-term cooperation with others, through a coordinated staff exchange programme.
Profile of the researchers	Experienced researchers based in EU or Associated Countries.	Experienced researchers based in a Third Country.	Experienced researchers from EU or Associated Countries.	Experienced researchers from any nationality after a period of mobility.	Researchers within the first five years of their research career.	Experienced researchers may be recruited to the contract; seconded researchers can be of all levels of experience.	COFUND provides support for regional and national fellowship programmes for experienced researchers.	All research staff of the participating organisations.
Profile of the hosts	Universities, research centres or enterprises established and located in EU or an Associated Country.	Universities, research centres or enterprises established and located in EU or an Associated Country (and certain Third Countries if return phase is applicable).	Universities, research centres or enterprises established and located in a Third Country (outgoing phase) and in EU or Associated Country (obligatory return phase).	Universities, research centres or enterprises established and located in EU or an Associated Country.	Universities, research centres, companies, SMEs.	Partnerships of commercial and non-commercial research organisations (universities, companies, SMEs etc.).	Public or private bodies responsible for funding and managing fellowship programmes.	At least two research organisations in different EU or Associated Countries and one or more organisations in countries with which the EU has an S&T agreement or which are covered by the Neighbourhood Policy.
How does it work?	Proposal submitted by researcher in liaison with host. Successful proposals receive up to 2 years support for the researcher's salary and a contribution to research expenses.	Proposal submitted by researcher in liaison with host. Successful proposals receive up to 2 years' support (+ one-year return phase if applicable).	Proposal submitted by researcher in liaison with return host (in EU or Associated Country). Successful proposals receive up to 3 years' support covering the outgoing and return phases.	Researchers apply jointly with host institution. Successful proposals get a flat rate contribution for 2 to 4 years and a grant agreement is signed with the host with a view to a lasting professional integration.	Successful proposals from a network receive funding for up to 4 years to cover costs of the researchers and for network activities including conferences and workshops.	Successful proposals receive funding for up to 4 years to cover the costs of the seconded and recruited researchers and for network activities including conferences and workshops.	Programme with at least one type of transnational mobility submits proposal for co-funding. Successful proposals receive up to 40% of full total costs.	Individual staff exchanges last 12 months maximum. Staff seconded by their organisations and return after the mobility period. Staff exchange programmes receive IRSES support for 24-48 months.

By pressing the following button, you accept the terms and conditions of usage of this site and more specifically :

Proposal pre-registration data

1. Information used for the pre-registration and creation of a draft proposal: Your Organisation, Acronym, Short Summary, Topics/Panels/Codes etc. (Step3) and the list of participants (Step4) – can be used by the services in charge for the planning of evaluations.
2. Short Summary describes briefly the purpose of the proposal with a maximum of 2,000 characters. Entering at least keywords will help the services in the planning of the evaluations. Coordinators may choose to enter 'xxx' at this stage should they prefer not disclosing any data.

Part B

3. **File format:** For the proposal content (part B) you must use exclusively PDF ("portable document format", compatible with Adobe Acrobat version 5 or higher, with embedded fonts). Most calls allow only one PDF file comprising the complete technical annex (part B) to be uploaded. You should check the call text and Guide for Applicants for possible exceptions.
4. **Time constraints:** Preparation and uploading of the PDF formatted part B may take some time. You should ensure that this has been completed in time, well before the call closure deadline.

Submission

5. In order to be made available for evaluation, proposals must be submitted prior to the call closure deadline. Likewise, modifications to proposals or uploaded attachments are also required to be submitted prior to the call closure deadline or they will not be taken into account. Proposals may be submitted or withdrawn at any time prior to the call closure deadline. There is only ever one version of a submitted proposal, as submission over-writes the previous version.

Part B – Table of Contents of Proposals

Recomendaciones

Respetar el nº de páginas,
las secciones y subsecciones

B1 Research and technological Quality (maximum 8 pages)

Research and technological quality, including any interdisciplinary and multidisciplinary aspects of the proposal

Appropriateness of research methodology and approach

Originality and innovative nature of the project, and relationship to the 'state of the art' of research in the field

Timeliness and relevance of the project

Host research expertise in the field

Quality of the group/scientist in charge

Es lo primero que va a leer el evaluador y la primera impresión es la que queda.

Motivación y aspectos esenciales del proyecto.

Objetivos concretos partiendo del conocimiento del estado del arte.

Metodología a emplear y por qué. Para cada objetivo de la propuesta.

Tiene que quedar demostrada la importancia de la investigación, por qué debe ser financiada.

Hablar de la institución de acogida: patentes, proyectos, colaboraciones internacionales, importancia del grupo...

B2 Training (maximum 2 pages)

Clarity and quality of the research training objectives for the researcher

Relevance and quality of additional research training as well as of transferable skills offered with special attention to exposure to industry sector, where appropriate

Measures taken by the host for providing quantitative and qualitative mentoring/tutoring

Competencias científicas, habilidades, capacidades... que se persiguen y qué supondrán para el ER.

No olvidar habilidades como la comunicación, la gestión de proyectos (científica y económica)

Hablar con la institución para conocer su experiencia previa en tutorización de investigadores MC.

B3 Researcher (maximum 7 pages which includes a CV and a list of main achievements)

Research experience

Research results including patents, publications, teaching etc., taking into account the level of experience

Independent thinking and leadership qualities

Match between the *fellow's* profile and project

Potential for reaching or reinforcing a position of professional maturity

Potential to acquire new knowledge

Detallar el CV:

Publicaciones, conferencias, proyectos nacionales y/o europeos en los que se ha participado, patentes, premios...

Estructurarlo de forma que sea claro.

Ayudar al evaluador a encontrar los logros más importantes.

Qué queremos conseguir.

B4 Implementation (maximum 6 pages)

Quality of infrastructures/facilities and international collaborations of host

Practical arrangements for the implementation and management of the research project

Feasibility and credibility of the project, including work plan

Practical and administrative arrangements, and support for the hosting of the *fellow*

Necesitamos la colaboración de la HI

Estructurar el proyecto en paquetes de trabajo:

definirlos, objetivos, entregables, calendario

Demostrar que hemos reflexionado en cada aspecto.

El Plan debe ser ambicioso, ir más allá del estado del arte pero al mismo tiempo sólido y realista. Plan de contingencia.

B5 Impact (maximum 4 pages)

Impact of competencies acquired during the fellowship on the future career prospects of the researcher, in particular through exposure to transferrable skills training with special attention to exposure to the industry sector, where appropriate

Contribution to career development or re-establishment where relevant

Benefit of the mobility to the European Research Area

Development of lasting cooperation and collaboration with other countries

Contribution to European excellence and European competitiveness regarding the expected research results

Impact of the proposed outreach activities

Volvemos al objetivo que persigue el programa: **Objetivo: Formación, movilidad y desarrollo profesional de los investigadores.**

Beneficios en la carrera del investigador.

Privacy and data protection

Use of human biological samples and data

Research on animals

Research in developing countries

Dual use

Fondo y Forma

- 27 páginas máximo (A4)
- Sin contar la tabla de contenidos, Ethical Issues y p. de inicio y final

- 15mm mínimo en márgenes
- Idioma: inglés

AREAS EXCLUDED FROM FUNDING

Research activity aiming at human cloning for reproductive purposes.

Research activity intended to modify the genetic heritage of human beings which could make such changes heritable (Research related to cancer treatment of the gonads can be financed).

Research activities intended to create human embryos solely for the purpose of research or for the purpose of stem cell procurement, including by means of somatic cell nuclear transfer.

A tener en cuenta:

0	The proposal fails to address the criterion under examination or cannot be judged due to missing or incomplete information
1 Poor	The criterion is addressed in an inadequate manner, or there are serious inherent weaknesses
2 Fair	While the proposal broadly addresses the criterion, there are significant weaknesses
3 Good	The proposal addresses the criterion well, although improvements would be necessary
4 Very Good	The proposal addresses the criterion very well, although certain improvements are still possible
5 Excellent	The proposal successfully addresses all relevant aspects of the criterion in question. Any shortcomings are minor

- La propuesta debe demostrar una calidad científica y tecnológica elevada.
- Hay que explicar la originalidad del proyecto y como se va a ir más allá del estado del arte.
- Nuestra propuesta tiene que convencer al evaluador.
- No olvidar la dimensión europea de la convocatoria.

CHECKLIST FOR GENDER IN RESEARCH

Equal opportunities for women and men in research

- ☐ Is there a gender balance in the project consortium and team, at all levels and in decision-making positions?
- ☐ Do working conditions allow all members of staff to combine work and family life in a satisfactory manner?
- ☐ Are there mechanisms in place to manage and monitor gender equality aspects, e.g. workforce statistics, as required by FP7?

Gender in research content

Research ideas phase:

- ☐ If the research involves humans as research objects, has the relevance of gender to the research topic been analysed?
- ☐ If the research does not directly involve humans, are the possibly differentiated relations of men and women to the research subject sufficiently clear?
- ☐ Have you reviewed literature and other sources relating to gender differences in the research field?

Proposal phase:

- ☐ Does the methodology ensure that (possible) gender differences will be investigated: that sex/gender-differentiated data will be collected and analysed throughout the research cycle and will be part of the final publication?
- ☐ Does the proposal explicitly and comprehensively explain how gender issues will be handled (e.g. in a specific work package)?
- ☐ Have possibly differentiated outcomes and impacts of the research on women and men been considered?

Research phase:

- ☐ Are questionnaires, surveys, focus groups, etc. designed to unravel potentially relevant sex and/or gender differences in your data?
- ☐ Are the groups involved in the project (e.g. samples, testing groups) gender-balanced? Is data analysed according to the sex variable? Are other relevant variables analysed with respect to sex?

Dissemination phase:

- ☐ Do analyses present statistics, tables, figures and descriptions that focus on the relevant gender differences that came up in the course of the project?
- ☐ Are institutions, departments and journals that focus on gender included among the target groups for dissemination, along with mainstream research magazines?
- ☐ Have you considered a specific publication or event on gender-related findings?

L'Oficina de Projectes Europeus de Recerca és una estructura integrada dins del Servei d'Investigació de la Universitat de València, amb l'objectiu de promoure la participació dels investigadors de la Universitat de València en totes les possibles fonts de finançament europees. Volem ser el punt de contacte i suport dels investigadors, així com dels administradors de les estructures de recerca, que desitgen participar, o que ja estiguen participant, en un projecte d'investigació finançat per la Comissió Europea.
