¿Qué es CEF?

What is CEF?

* - 100 m Juncker Package

HOW IS IT REGULATED?

CEF Regulation

The Connecting Europe Facility (CEF) is a regulation that defines how the Commission can finance support for the establishment of trans-European networks to reinforce an interconnected Europe.

CEF Telecom Guidelines

The CEF Telecom guidelines cover the specific objectives and priorities as well as eligibility criteria for funding of broadband networks and Digital Service Infrastructures (DSIs).

CEF Work Programme

Translates the CEF Telecom Guidelines in general objectives and actions planned on a yearly basis.

Presupuestos del programa CEF

THE CONNECTING EUROPE FACILITY (CEF)

ADVANCING CROSS-BORDER PROJECTS

With a proposed budget of **€42.3 billion** for seven years (2021-2027), CEF will support infrastructure projects connecting the EU and its regions. It will also aim to better integrate the transport, energy and digital sectors, in order to accelerate the **digitalisation** and **decarbonisation** of the EU's economy.

In particular, 60% of the CEF budget will contribute to **climate objectives** in line with the **EU's commitments under the Paris Agreement**.

Building on the success of the previous programming period (2014-2020), CEF will also continue to bridge the investment gap in Europe and to **generate jobs** and **economic growth**.

Lastly, the facility will provide the opportunity to deploy technologies developed through the EU R&I programmes, boosting their market uptake and ensuring **the trans-European networks** are equipped with advanced technology.

BUDGET DEDICATED TO THE CONNECTING EUROPE FACILITY (IN BILLION EUROS)

Connecting Europe Facility

Financing instrument of trans-European networks from 2014 to 2020 - procurement, grants and innovative financial instruments

Regulation no 1316/2013

Transport

€26.25 billion

Energy

€5.85 billion

Telecom

€1.14 billion

Reglamento eIDAS

REGULATION (EU) No 910/2014 relativo a la identificación electrónica y los servicios de confianza para las transacciones electrónicas en el mercado interior

Artículo 43 - Efecto jurídico de un servicio de entrega electrónica certificada

(1.) "A los datos enviados y recibidos mediante un servicio de entrega electrónica certificada no se les denegarán efectos jurídicos ni admisibilidad como prueba en procedimientos judiciales por el mero hecho de que estén en formato electrónico o no cumplan los requisitos de servicio cualificado de entrega electrónica certificada. "

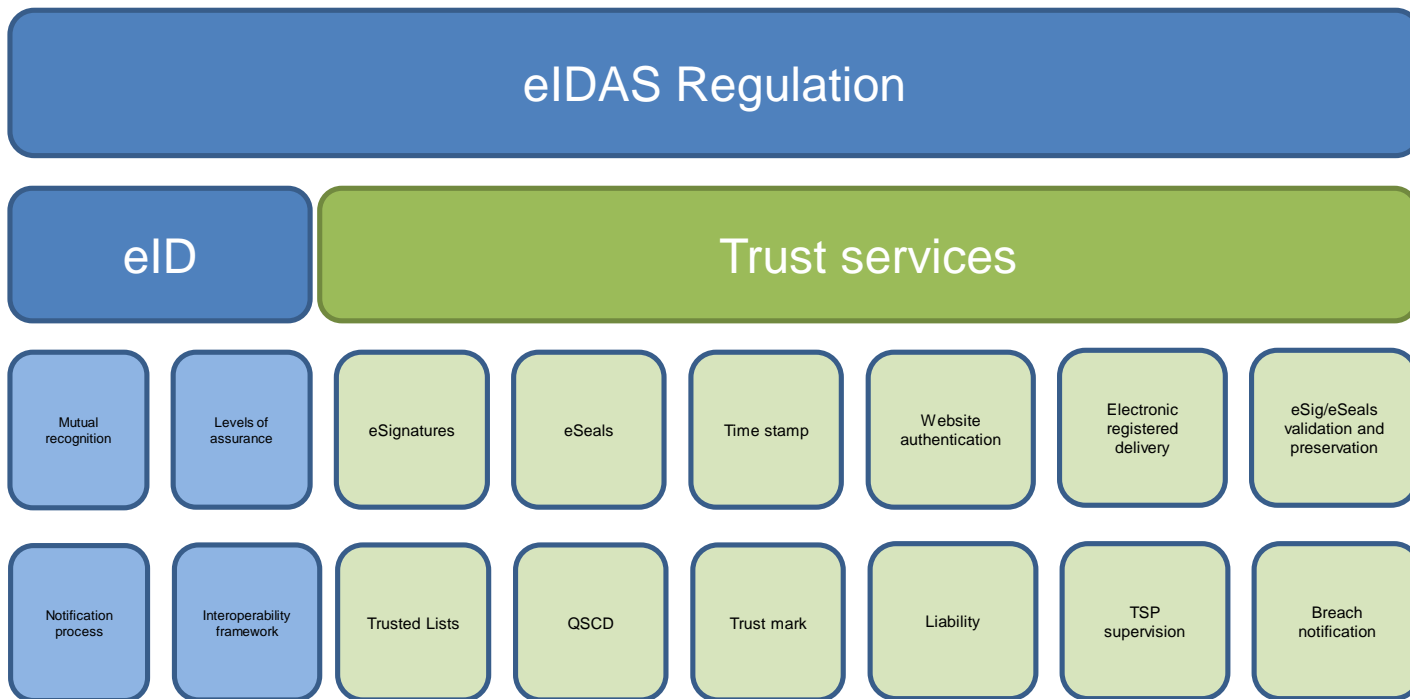

(2.) "Los datos enviados y recibidos mediante un servicio cualificado de entrega electrónica certificada disfrutarán de la presunción de la integridad de los datos, el envío de dichos datos por el remitente identificado, la recepción por el destinatario identificado y la exactitud de la fecha y hora de envío y recepción de los datos que indica el servicio cualificado de entrega electrónica certificada. "

Fases de preparación y desarrollo

Preparación de la propuesta (competitiva)

- Consorcio
- Fechas límite
- Conformidad del ministerio
- Aplicación de solicitud (TENTec) y anexos necesarios
- Prioridades del programa correspondiente

Desarrollo del proyecto

- Firma del contrato (Grant Agreement)
- Supervisión y certificación del ministerio
- Apoyo y supervisión por el técnico de INEA
- Gestión del proyecto según plan de trabajo, hitos y presupuesto
- Informes finales con plantillas CEF, entregables y pago de la subvención

¡Gracias!
