SUMMARY

Civil Law III is a compulsory subject taught in the third year of the Degree in Law throughout the entire academic year (first and second semester). It is worth 7.5 credits (the workload is 187.5 hours).

The subject covers Book II (On property, ownership and its modifications) and the preliminary provision and Title I (On occupancy) of Book III (On the different ways of acquiring ownership) of the Civil Code, without prejudice to the application of various special laws, especially the Mortgage Law and its Regulations, or those governing the so-called "special properties". It includes the General Theory of Rights in rem (concept of rights in rem, private autonomy in the creation of rights in rem, structure and content of the relationship between law and property, acquisition and extinction of rights in rem, modification of rights in rem and community of property), the possession, the ownership and the special properties; limited rights of enjoyment, rights of security interests, acquisition rights, and Immovable Property Registry Law.

Along with the Law of Obligations and Contracts - which is the subject matter of Civil Law II, taught in the second year of the Degree in Law – it is part of Civil Property Law, focusing on the problems of ownership over economic goods.

There are optional subjects that complete this subject, such as the Credit Guarantees or Notarial and Registry Law, in order to lighten and coordinate contents.
