

Miguel V. Andrés was born in Valencia (Spain) in 1957 and, at present, he is Professor at the Department of Applied Physics of the University of Valencia, Spain, being responsible for the leadership and management of the Laboratory of Fiber Optics (www.uv.es/fops/lfo). He received the B.Sc. and Ph.D. degrees in physics from the University of Valencia, Spain, in 1979 and 1985, respectively. Since 1983, he has successively served as Assistant Professor, Lecturer, and Professor in the Department of Applied Physics, University of Valencia, Valencia, Spain. After a postdoctoral stay (1984-1987) at the Department of Physics, University of Surrey, U.K., he founded the Laboratory of Fiber Optics at the University of Valencia. His current research interests include photonic crystal fibers, in-fiber acousto-optics and optomechanics, fiber lasers and new fiber-based light sources, fiber sensors, optical microcavities, microwave photonics, and waveguide theory. He has, over the past 30 years, published more than 300 research papers (Research ID: M-2555-2014, ORCID: 0000-0003-0103-8644). His research activity includes an increasing number of collaborations with Latin America universities and research institutes of Mexico, Argentina, Costa Rica, Peru and Brazil, among others. In 1999, he was awarded the *Premio Cooperación Universidad-Sociedad 1999* of the *Consejo Social de la Universidad de Valencia*. Since 2009, he is member (*Académico Correspondiente*) of the *Real Academia de Ciencias de Zaragoza*. M. V. Andrés is member of SEDOPTICA, RSEF, Optica, EOS and senior member of IEEE.
