

Young Researcher Course:
Scientific Integrity Decline in Current Materials Research:
Dimension, Origins, Elements, and Solutions

Johannes Gierschner, Dr. rer. nat. habil.
Madrid Institute for Advanced Studies, IMDEA Nanoscience, Madrid, Spain

Table of Contents

1. Scientific Misconduct: only the Tip of the Iceberg
2. The Erosion of Scientific Integrity: Metrics-Based Quantitative Evaluation
3. Elements of Scientific Misconduct
Climbing up the Iceberg ...an example from Current Materials Research
4. Dissemination
 - How (not) to publish: (AI-assisted) Scientific Hyperproliferation, Salami & Junk Papers, Scientific Paper Mills, Fake Peer Review
 - Where (not) to publish: Journal Impact Factor, Predatory, Junk & Fake Journals
 - How (not) to cite: Self-Citation, Citation Cartels, Rogue Editors & Reviewers
 - How (not) to review: Publishing without Peer Review?
 - Where (not) to attend (and not to join the board): Predatory & Fake Conferences
 - How (not) to affiliate: "Gift" and Fake Affiliations
5. How & with whom to work: Elements of Good Scientific Practice
