

ADS/CFT: A STRINGY PILGRIMAGE TO NON-ABELIAN GAUGE THEORY

Department of Particle Physics
University of Santiago de Compostela

A LAICAL PILGRIMAGE

Santiago de Compostela has been part of another *European network* since more than a thousand years ago

It also dealt with the constituents and fundamental forces of the Universe, in a broader sense...

Today, I will briefly introduce the activity of our group of research, a stringy pilgrimage to non-Abelian gauge theory

MEMBERS OF THE GROUP

Faculty

Javier Mas

Alfonso V. Ramallo

José M. Sánchez de Santos

Ramón y Cajal Fellow

José D. Edelstein

Postdocs

Paolo Merlatti

Jonathan Shock

Dimitrios Zoakos

PhD Students

Daniel Areán

Felipe Canoura

Javier Tarrío

Eduardo Conde

RELATED GROUPS IN SANTIAGO

Field theory and integrable systems

J. Luis Miramontes

Joaquín Sánchez-Guillén

Christoph Adam

Paolo Grinza

Heavy ion collisions and QCD Phenomenology

INCOMPLETE FAMILY PICTURE

LINES OF RESEARCH

Quenched Flavor in AdS / CFT

Unquenched Flavor in AdS / CFT

AdS / CFT and Quark-Gluon plasma

Supersymmetric branes, D-brane probes and intersections

AdS / CFT with reduced supersymmetry

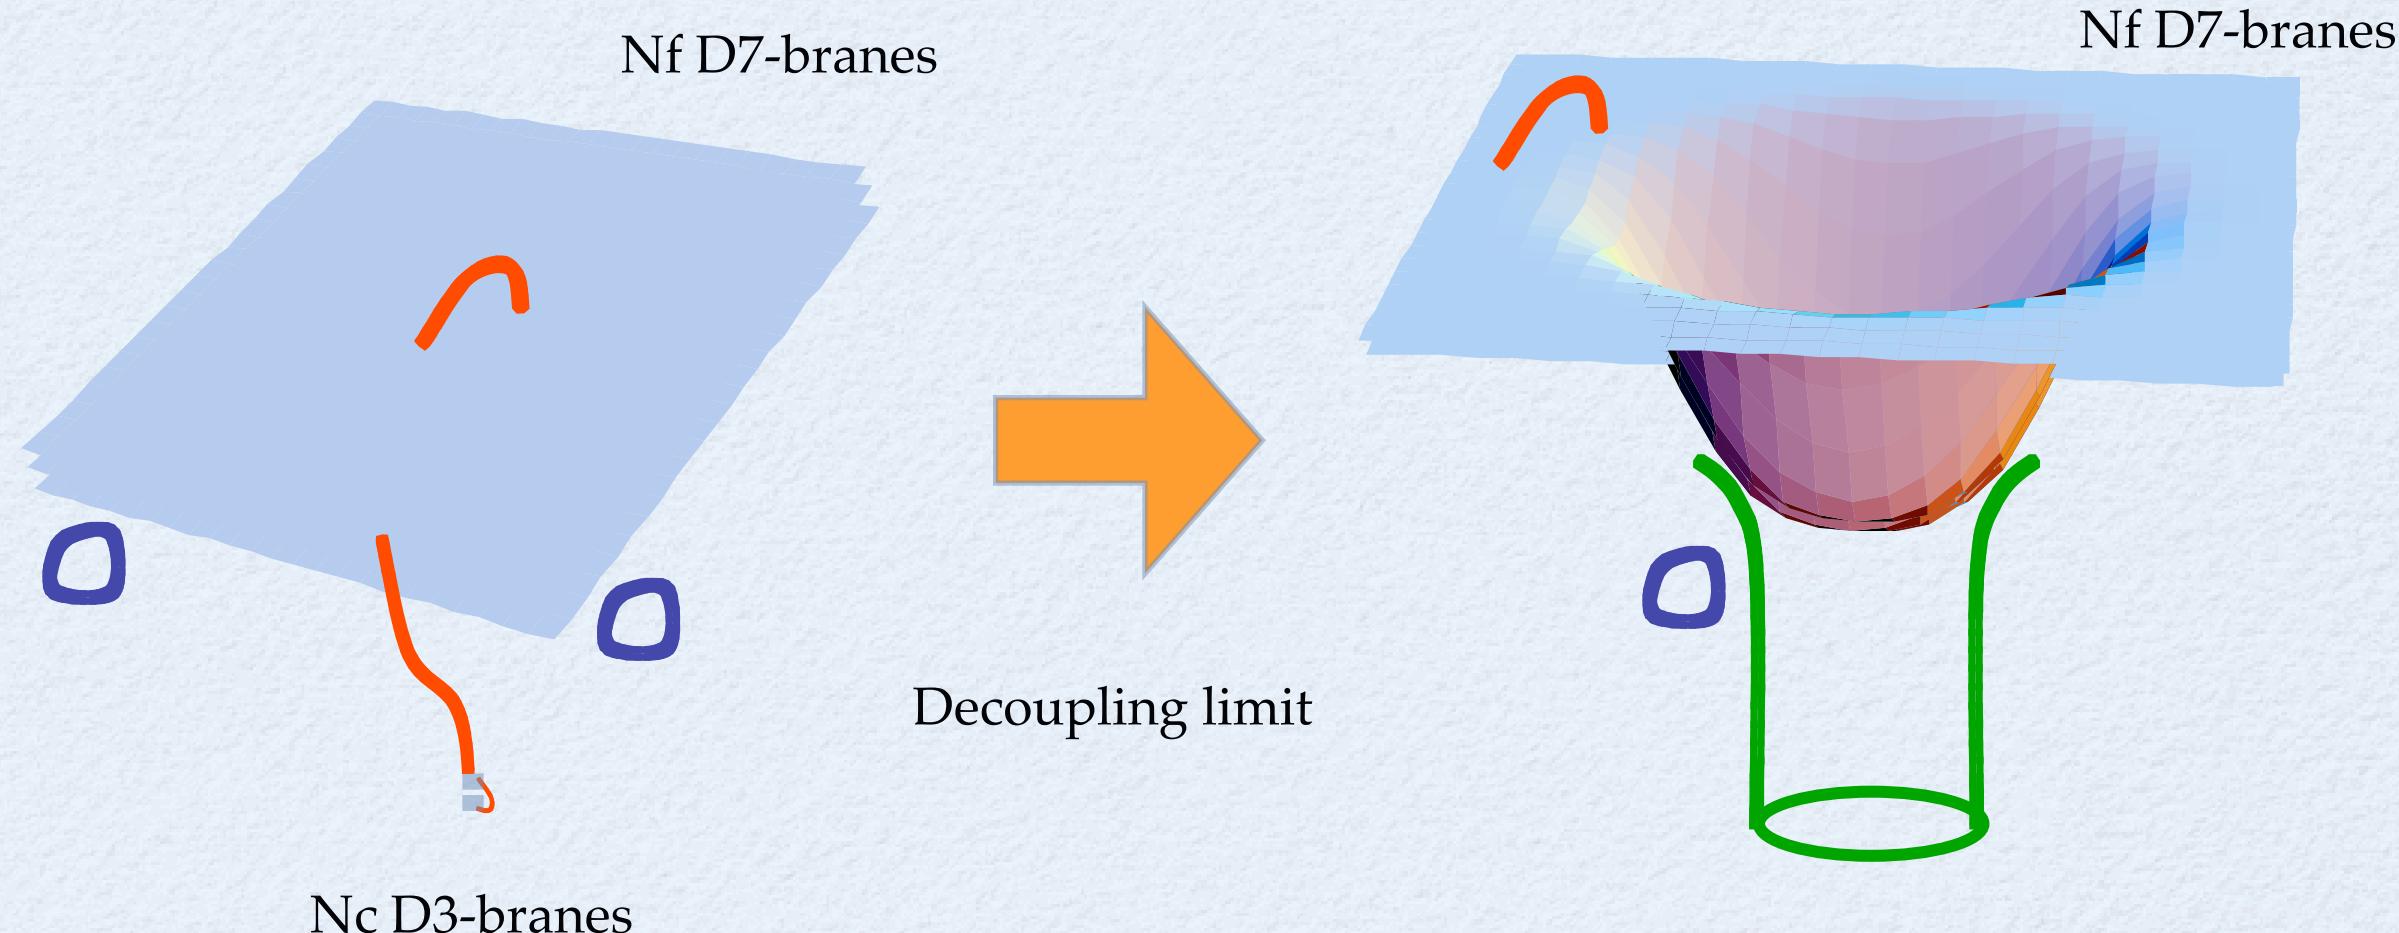

Chern-Simons supergravity

QUENCHED FLAVOR IN ADS/CFT

$N_f \ll N_c$

Karch-Katz, 2002

N_c D3-branes

$N_c \rightarrow \infty$
 $g_s \rightarrow 0$
 $N_f = \text{constant}$

$$\lambda_7 \sim \lambda_3 l_s^4 N_f / N_c \rightarrow 0$$

$$\lambda_3 \sim g_s N_c \rightarrow \text{constant}$$

QUENCHED FLAVOR IN ADS/CFT

Flavoring the gravity dual of N=1 Yang-Mills with probes

Carlos Núñez (MIT), Angel Paredes, Alfonso V. Ramallo

Journal of High Energy Physics 0312:024, 2003

Adding flavor to the gravity dual of non-commutative gauge theories

Daniel Areán, Angel Paredes (Ecole Polytechnique), Alfonso V. Ramallo

Journal of High Energy Physics 0705:044, 2007

UNQUENCHED FLAVOR IN ADS/CFT

$N_f \approx N_c$

Casero-Nunez-Paredes, 2006

Flavor branes are smeared along their transverse directions. For example, in $AdS_5 \times T^{1,1}$,

◆ Unquenched flavors in the Klebanov-Witten model

Francesco Benini (Trieste), Felipe Canoura, Stefano Cremonesi (Trieste), Carlos Núñez (Swansea), Alfonso V. Ramallo

Journal of High Energy Physics 0702:090, 2007

◆ Backreacting flavors in the Klebanov-Strassler background

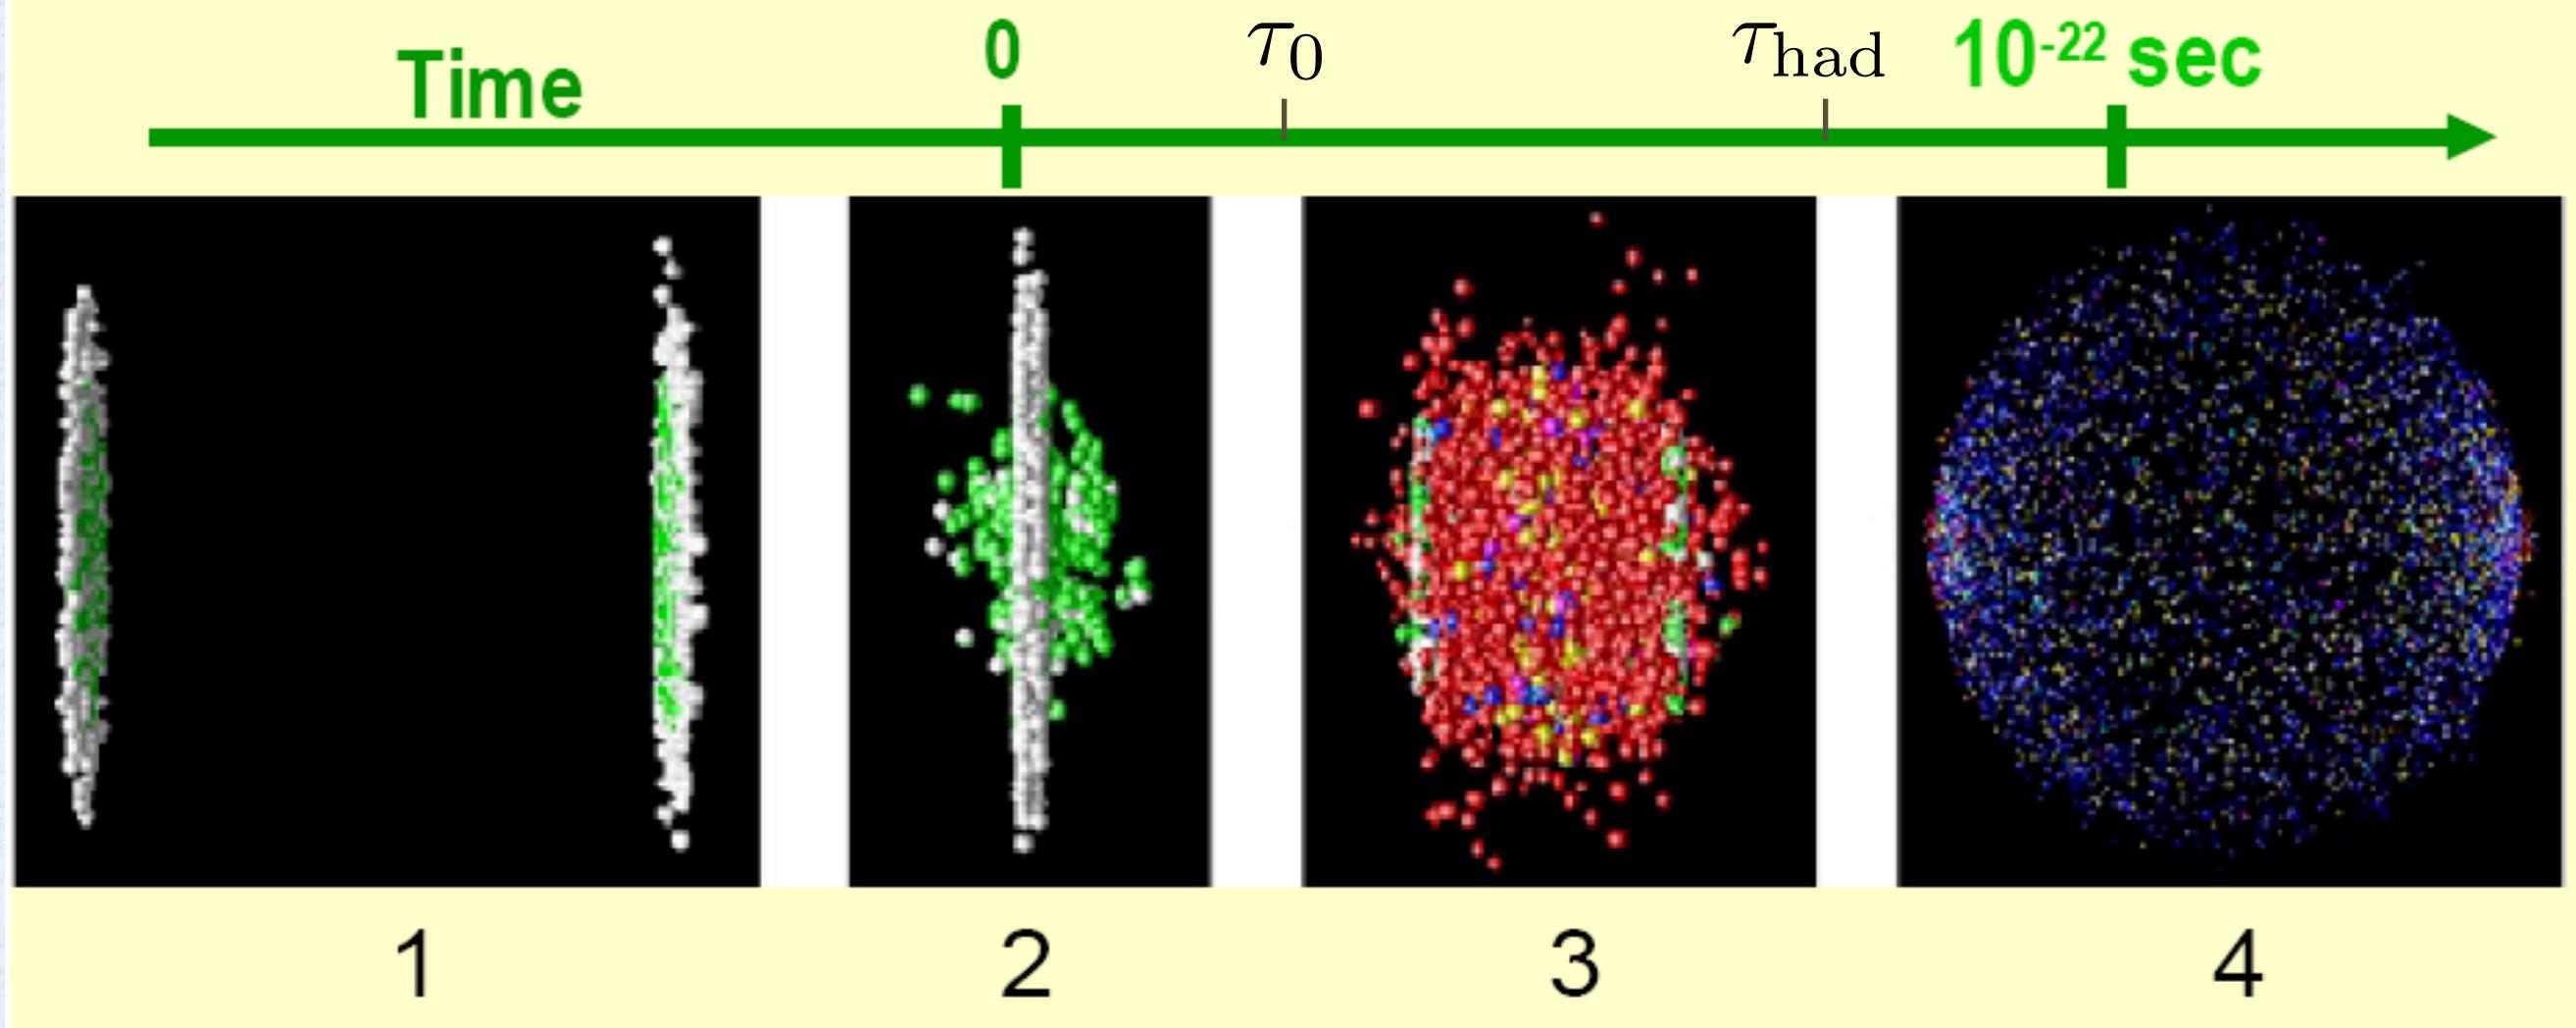

Francesco Benini (Trieste), Felipe Canoura, Stefano Cremonesi (Trieste), Carlos Núñez (Swansea), Alfonso V. Ramallo

arXiv:0706.1238 [hep-th]

ADS/CFT & QUARK-GLUON PLASMA

Exploring Heavy Ion Collisions... the Emerging Picture

The time sequence of a central (head-on) gold-gold collision at RHIC

Shear viscosity, jet quenching, drag force, meson melting, J/ ψ suppression, speed of sound, screening lengths, diffusion coefficients, dynamical cooling and expansion, confinement/deconfinement transition, etc, etc

AdS/CFT & QUARK-GLUON PLASMA

Shear viscosity from R-charged AdS black holes

Javier Mas

Journal of High Energy Physics 0603:016, 2006

Jet quenching at finite 't Hooft coupling and chemical potential from AdS/CFT

Néstor Armesto (Santiago de Compostela), José D. Edelstein, Javier Mas

Journal of High Energy Physics 0609:039, 2006

The shear viscosity of the non-commutative plasma

Journal of High Energy Physics 0609:038, 2006

Probe D-branes in superconformal field theories

José D. Edelstein

Fortschritte der Physik 55:705, 2007

CHERN-SIMONS SUPERGRAVITY

Higher dimensional gravity is dictated, in general, by Lovelock theory

$$\mathcal{L} = \sum_{p=0}^{\left[\frac{D-1}{2}\right]} \alpha_p \mathcal{L}_p \quad \mathcal{L}_p = \epsilon_{a_1 \dots a_D} R^{a_1 a_2} \wedge \dots \wedge R^{a_{2p-1} a_{2p}} \wedge e^{a_{2p+1}} \wedge \dots \wedge e^{a_D}$$

There is a special case in which a given symmetry group (say, that dictated by the M-algebra) can be realized off-shell in odd-dimensional (say, eleven) dimensions

This suggests a possible connection between Chern-Simons supergravity and M-theory

MISCELLANEOUS ACTIVITIES

Workshop on Gravitational Aspects of Strings and Branes

Gravity, Strings and Gauge Theories

Santiago de Compostela, 8-11 February 2006

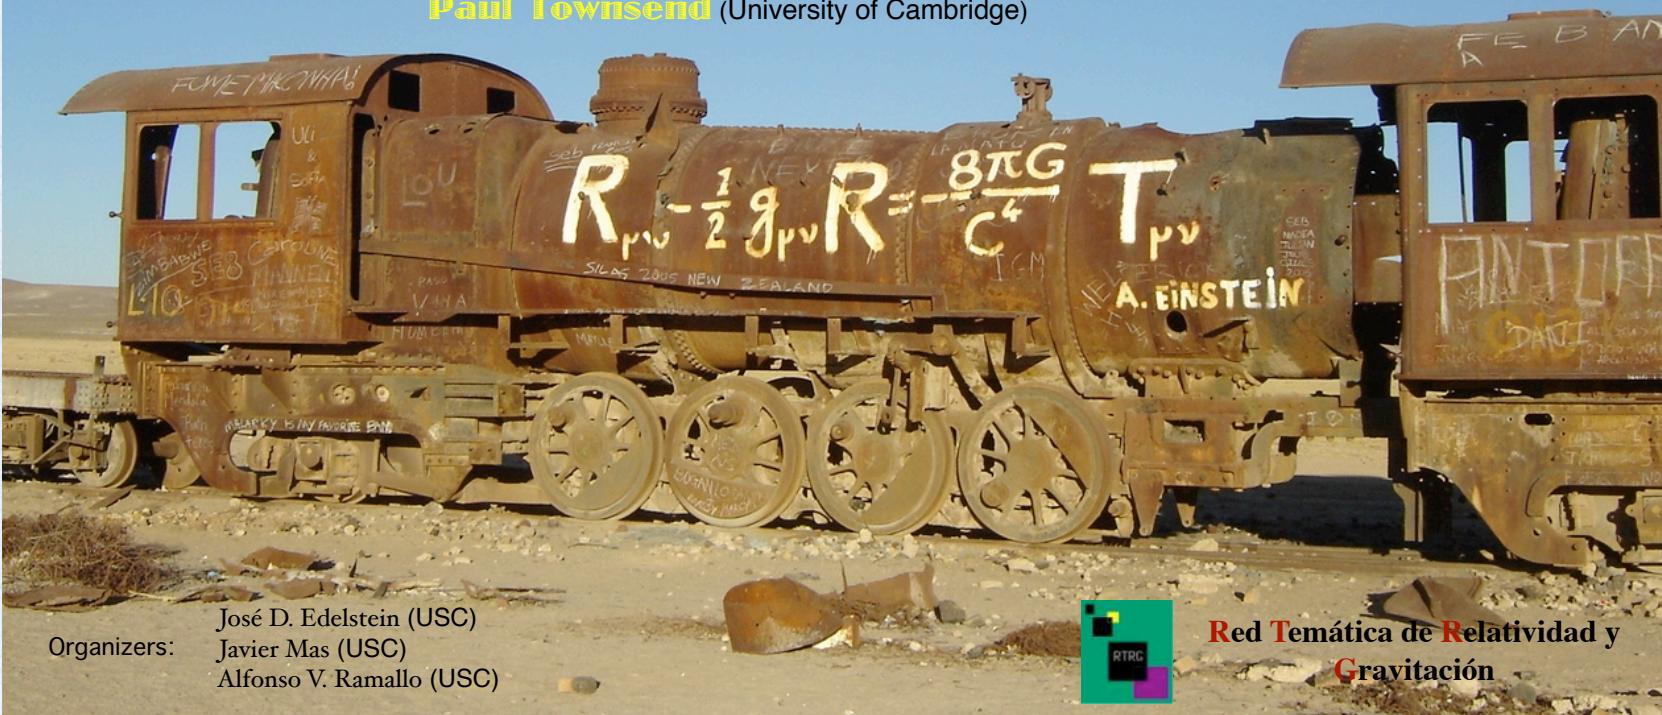

<http://fpmacth1.usc.es/gsgt06/>

Invited Speakers:

David Berenstein (University of California, Santa Barbara)

Andrei Starinets (Perimeter Institute)

Paul Townsend (University of Cambridge)

Organizers:

José D. Edelstein (USC)
Javier Mas (USC)
Alfonso V. Ramallo (USC)

Red Temática de Relatividad y
Gravitación

Departamento de Física de Partículas

and

Instituto Gallego de Física de Altas Energías
(IGFAE)

Seminars and Courses (Theory)

2007/2008

19 Oct 07

Frank Wilczek (MIT)
TBA.

27 Sep 07

David García (ICN-UNAM)
Partonic energy loss due to collisions in a QCD finite medium (off-shell particles).

26 Sep 07

Nicolás Grandi (Univ. Nacional de La Plata)
A proposal for early time cosmology: The Cosmological Slingshot scenario.

11 Sep 07

Andrés Gomberoff (Univ. Andrés Bello)
Counting the negative eigenvalues of the three dimensional thermalon.

3 Sep 07

Grzegorz Wilk (Soltan Inst. for Nuclear Studies, Warsaw)
Fluctuations, correlations and non-extensivity.
