**Manuscript title:**

**Sent for review (date):**

**Returned after review (date):**

### ELEMENTS TO EVALUATE

1. The title of the paper is clear and reflects the issue of the paper adequately. *(Focus on grammatical, syntax or other kinds of errors in all three languages).*

2. The abstract and the keywords are chosen adequately.

3. In case of tables, graphs and other illustrations: Are they relevant and are they compiled correctly? In case there are no tables, graphs and other illustrations, please indicate it.

4. The language of the paper is chosen properly according to the academic and scientific purposes.

5. The authors comply with the submission guidelines and structure the paper adequately.

6. Do you think the authors should improve the wording in general? If so, could you give some guidance in this respect? *

7. Relevance and currency of references and literature review.
8. Evaluate if the arguments are used properly.

9. Evaluate the paper’s originality and scientific contribution referring to own knowledge of the issue presented.

10a. In terms of research papers: Is the paper clear and are the paper’s objectives, hypothesis, methodology and conclusions consistent? Evaluate the methodological rigour, research tools and results.

10b. In case of a discussion paper on some current status, literature review or divulgation of a concrete issue, how would you evaluate the rigour, depth, topicality of these aspects and the interest to be published in @tic?

11. Is the bibliography relevant, current and broad? Evaluate also if the bibliographical references and literature references follow the APA 6th edition guidelines. Evaluate if the references in the text are used adequately.

12. Do you recommend its publication in @tic. revista d’innovació educativa?*
