

Seminar(i)

What's wrong with the bees? How to predict the effects of global change on pollinators.

Ignasi Bartomeus

Estación Biológica de Doñana (EBD-CSIC) - Dpto.
Ecología Integrativa.

In this talk, I'll present what we know about current trends in pollinator populations, main threats, and potential mechanisms explaining its responses to human-induced rapid environmental change.

WHERE?

Online. Zoom registration link:
