

C. Isolation of the strain

*Date of isolation:

*Country, Locality, State:

*Isolated by (person and/or institution):

*If you did not isolate the strain, please indicate scientists or laboratories which maintained it before you:

depositor <

D. Risk Assessment (Directive 2000/54/EC). CECT accepts strains belonging to risk group 1, 2 and 3^(*)

Risk group: group 1 group 2 group 3^()

*Pathogenic or likely pathogenic for: humans animals plants specify:

E. Growth and maintenance

*Temperature °C:

*Time of incubation:

*Metabolism: Aerobic

Facultative anaerobe

Microaerophilic

Strict anaerobe

*Special requirements (light, gas phases, etc.)

Does this microorganism survive freezing? YES NO

*Culture medium (CECT number or composition):

Only for Arbuscular Mycorrhizal Fungus

*Host plant:

in vitro cultures (culture medium and trap plant):

F. Additional data

Methods used for strain identification (attach reprint or supply strain specific data):

*Reasons for deposit (biotechnological applications, quality control, etc.):

AGREEMENT FOR DEPOSIT IN THE OPEN COLLECTION:

1. Information regarding public deposits that are pending of taxonomic description will be kept confidential until description is published or until the depositor authorizes the publication in the open catalogue. If the information is not published after 4 years from the deposit, CECT reserves the right to release the strain to the public catalogue.
2. The undersigned declares that the samples from which the strains were isolated were collected according to the legislation of the country of origin and that the deposit of the strain at the CECT does not infringe any national regulation.
3. The undersigned declares that the information provided in this form is true.
4. The undersigned accepts that CECT supplies the strain under conditions in agreement with section B and/or according to the terms specified in the CECT MTA, and that the CECT can adopt this MTA at any time.

ANNEX I

Fill it only if the microorganism is genetically manipulated

Spanish regulations (law 9/2003 and bylaw 178/2004) require that we register some information about all Genetically Modified Organisms (GMOs). GMO means an organism, with the exception of human beings, in which the genetic material has been altered in a way that does not occur naturally by mating and/or natural recombination, as defined in Article 2 of the Directive 2001/18/EC.

Please, include as much information as possible and attach reprints if necessary.

1. Host organism:

Risk group: group 1 group 2 group 3^(*)

Pathogenic for: humans animals plants specify:

Is the host organism a GMO? YES (provide information about the previous modification(s)) NO

2. Donor organism:

Risk group: group 1 group 2 group 3^(*)

Pathogenic for: humans animals plants specify:

Is the host organism a GMO? YES (provide information about the previous modification(s)) NO

3. Genetic modification

Deletion Insertion base substitution others

Describe as precisely as possible the modification: Sequence and/or name of the gene(s)/region(s) and their function, use of vectors (plasmids, viruses..., include the map), description of the protocol, etc.

4. Resulting GMO:

If a vector has been used, indicate if

it is lost it remains episomic

it is inserted in the genome randomly it is inserted in the genome in a defined position

If a viral vector has been used:

Has the presence of contaminating replicative forms been discarded? YES NO

Can replicative forms be produced, for example, by recombination? YES NO
