

Graduate Programme: Strengthening Ethics and Academic Integrity in Current Research: Promoting Responsible Practices in the Age of AI (September-December 2026)

Come and join us for this exciting series of webinars and conferences on Ethics and Academic Integrity in the Age of AI.

- Our ambition is to help you discover, reflect and implement the principles, frameworks and reference texts of research ethics and scientific integrity at a time when they are being transformed by Gen AI.
- We offer a series of webinars, online activities, conferences and a final workshop on-site to share our findings and engage in a productive discussion.

What you will learn:

- You will be able to recognize and address the ethical challenges related to research, adopt a culture of scientific integrity by promoting principles and practices that strengthen the legitimacy and credibility of scientific knowledge.
- You will understand the dilemmas involved in using Gen AI in research and will learn about new forms of fraud powered by these technologies.

- You will understand contemporary developments in scientific communication and publishing in the context of Open Science.

For whom?

Master's level students in the Humanities (1 or 2), FORTHEM MA students.

Organization

- 1 warm-up session (1 hour) (online), 4 webinars (online) and 2 days on-site (including conferences and a practical workshop) in the Université Bourgogne Europe (Dijon, France).
- Duration: September-December 2026
- Deadline to enrol: 10 September 2026
- On-site workshop (2 days): 7 and 8 December 2026

Facilitators

- Bénédicte Coste (UBE) & Cinta Gallent-Torres (UV, REDIE-CYTED)
