Author Workshop Summary

- Generalities on how to present and send a Scientific Article
- Peer Review process
- Why publishing and what to publish?
- Article Types
- Structure of Scientific Articles
- Revision and Forwarding of a Scientific Article
- Ethical Aspects
- Open Access
- Data Sharing

Publishing research in well-known scientific journals is one of the most prominent ways that researchers build their reputation within their community and allow wide dissemination and access to their work. During this presentation we will be going through the basic structure of a research article, introducing best practice tips and tricks when writing a paper, highlighting the editorial and peer-review process, and discussing about the main ethical issues that authors, reviewers, editors, and publishers face on a day-to-day basis.

This Author workshop aims to advise, and provide tips to authors to improve the quality of their manuscripts and therefore increase the chances of their papers to accepted for publication in reputable, international, ISI-listed journals
