

**Genaro Saavedra** received his B. Sc. and Ph. D. degrees in Physics from *Universitat de València*, Spain, in 1990 and 1996, respectively. His Ph. D. work was honored with the Ph. D. Extraordinary Award. He is currently an Associate Professor with this University. Since 1999 he has been working with the “3D Display and Imaging Laboratory”, at the Optics Department. His current research interests are optical diffraction, integral imaging, 3D high-resolution optical microscopy and phase-space representation of scalar optical fields. He has published on these topics about sixty technical articles in major journals and four chapters in scientific books. He has published over eighty conference proceedings, including twenty-five invited presentations.
