

I²SysBio Seminars

INSTITUTE FOR
INTEGRATIVE
SYSTEMS BIOLOGY

12:30

I²SysBio seminar room

2024

November

November 4

Sara Landeras Bueno (Universidad CEU Cardenal Herrera). *“Nucleoproteins of RNA viruses: targets to prevent the next pandemic?”*

November 5

Shih-Shun Lin (National Taiwan University). *“The unique biological properties of AGO1 reveal the autonomy of gene regulation in RNA silencing”*

November 20

Murat Tugrul (Freie Universität Berlin) *“Stochastic and Asymmetric Cellular Damage in Bacteria: Implications for Ageing, Population and Evolutionary Dynamics”*

November 25

Martin Aluja *“Overview on the grave problems related to scientific integrity/ethics that are starting to overwhelm us (or have already overrun us), with a cautious final focus on gender”*

December

December 2

Matin Aluja *“Expansion of the host and geographical range likely caused by Global Warming of the Mexican fruit fly, Anastrepha ludens, and recent discoveries on the gut microbiota of this important fruit pest of quarantine significance”*

December 5

Laura Victoria Florez Patino (University of Copenhagen). *“TBA?”*

December 9

BE-I2SysBio: Building & Expanding I2SysBio.

December 18

Pedro Cabello Yeves (University of Warwick, UK). *“What makes an aquatic salt-adapted prokaryote different from a salt-free one?”*

I²SysBio is a joint research centre Universitat de València/CSIC
