“Robotization,
digitalization, and
the future of work”

July 17 - 18, 2023

Faculty of Psychology

University of Valencia & University of Sevilla

The Research Institute of Personnel Psychology, Organizational Development, and Quality of Working Life (IDOCAL) is organizing the XIII Scientific Conference on Research in Human Resources and Psychology in collaboration with the Interuniversity Ph.D. program in Human Resources Psychology by the Universities of Seville and Valencia, and the Research project "Robotization's Influence on Job Characteristics and Work Outcomes," funded by Generalitat Valenciana (PROMETEO). The conference's main objective is to strengthen research on the psychosocial aspects of human capital and resources in organizations, facilitate knowledge sharing among researchers from national and international universities, and promote the transfer of this knowledge to the current socioeconomic environment.

The conference will analyze various trends and topics of interest that will contribute to the progress of our society. Some of these topics include the influence of robotization and digitalization on work, the promotion of sustainable well-being in organizations, the development of human capital, and the social and organizational factors that promote employability and conflict resolution processes. The participation of researchers from different lines of research in this field, both from the University of Valencia and the University of Seville, will enable us to engage in debates and reflections on our discipline's challenges.

Furthermore, we are delighted to announce the participation of visiting professors Pascale Le Blanc (Eindhoven University of Technology) and Andrea Svicher (University of Florence).

We would like to express our gratitude to all those who have made this conference possible.

 

09:15

Welcome & Introduction of the Ph.D. Scientific Conference

09:30

An Ethical Perspective on Evaluating Advanced Technologies in Workplace Settings.
Guest Speaker: Pascale Le Blanc / Eindhoven University of Technology

SESSION 1.

Digitalization and work.
