## 1. Eventos: ESTEEM project's first interactive Safety Training Workshop

On 27th November 2018, the ESTEEM project held their first interactive workshop about safety training for low-skilled and migrant workers in the construction industry.

It took place simultaneously in Sheffield, Bologna and Valencia. During this event, fundamental knowledge about the ESTEEM project was shared with the public, and feedback gained on our ideas.

They were most productive events – many thanks to all involved!

For more information about the workshop, click [here](#).

## 2. Recursos: Release of ESTEEM project outputs

Two transnational project meetings (in Bologna and Valencia) have been held in the ESTEEM project, leading to some interesting project outputs.

The first output aimed to collect information about similarities and differences in Italy, Spain and the UK (and other countries) regarding training of workplace safety. Thanks to the leading role of the University of Valencia the output is now available in form of useful resources on:

- 1) Safety training programmes, courses, activities and tools, including assessment and certification, for both trainers and trainees.
- 2) Studies, reports and databases providing indexes and indicators relating to health and safety, accidents, injuries and fatalities.
- 3) Organisations, institutions and professional bodies associated with health and safety.
- 4) Laws, norms and regulations related to health and safety.

You can find all these useful resources clicking [here](#).
