1. Eventos: Reunión del proyecto ESTEEM

El lunes y martes 22 y 23 de Octubre se reúnen en el IDOCAL los miembros del equipo investigador del proyecto ESTEEM sobre el entrenamiento en seguridad para los trabajadores inmigrantes del sector de la construcción. En este proyecto participan la **Universidad de Sheffield** como coordinadora y las **Universidades de Valencia y Bologna**. Además participan empresas especialistas en formación en seguridad como Valora Prevención y IIPLe (Italia). El equipo de la UV esta compuesto por **José M. Peiró (coordinador)**, **Laura Lorente**, **Alicia Salvador** e **Irene Bresó**.

Sobre el proyecto ESTEEM:

ESTEEM: European Safety Training and Evaluation Supporting European Mobility

The health and safety of all workers remains paramount across Europe. However, certain sectors, such as the construction industry, still lag behind in their implementation of safety procedures, with often fatal consequences. There is a critical need to deliver effective safety training – especially to low-skilled and migrant workers in high risk environments such as the construction industry. Furthermore, there are currently no established frameworks for evaluating the quality and efficacy of safety training.

Arising from these challenges, the primary goal of ESTEEM is to maximise the quality and efficacy of safety training programmes provided in the EU. Taking a multi-national and multi-disciplinary approach, ESTEEM aims to:

- *Enhance access to training and qualifications for all by shaping its training activities to the needs and competencies of low-skill and migrant workers in the construction industry.*
- *Promote Social Inclusion by applying design project methodologies which include stakeholders' needs from the very beginning.*
- *Aid the mobility of workers within the EU by developing a Safety Training Certificate System for trainers and trainees which is transparent and which provides trainees with a certification of skills recognised across the EU.*
