

IOP | ebooks™

A collaboration to enhance and
share humanity's scientific
understanding of the universe.

The American Astronomical Society (AAS) and IOP Publishing (IOP) have created a partnership to further enhance the AAS mission: “to share humanity’s scientific knowledge of the universe.”

Combining the award-winning IOP book program with the vast expertise of the AAS community allows specific subject areas to be explored in depth by community experts in the most fascinating areas of astronomy and astrophysics.

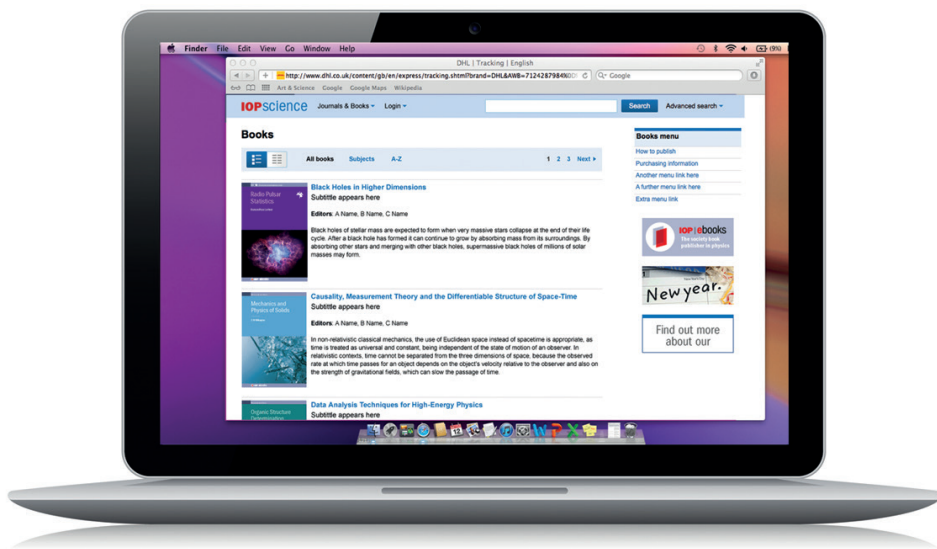

The AAS–IOP Collection

During the first phase of our partnership, all books will be approved and endorsed by the AAS Expert Advisory Board and published within the *IOP Expanding Physics™* collection.

The AAS–IOP book collection will be simultaneously developed over the next two years to develop a dedicated collection focusing on astronomy, astrophysics, instrumentation, methods and technologies, celestial mechanics, astrometry, solar astronomy, planetary systems, stars, the galaxy, cosmology and related subject areas.

Why ebooks?

By creating born-digital ebooks, authors are able to fully exploit ever-evolving digital publishing capabilities. Multimedia and advanced features become an integral part of the ebook, offering an enhanced reading and research experience.

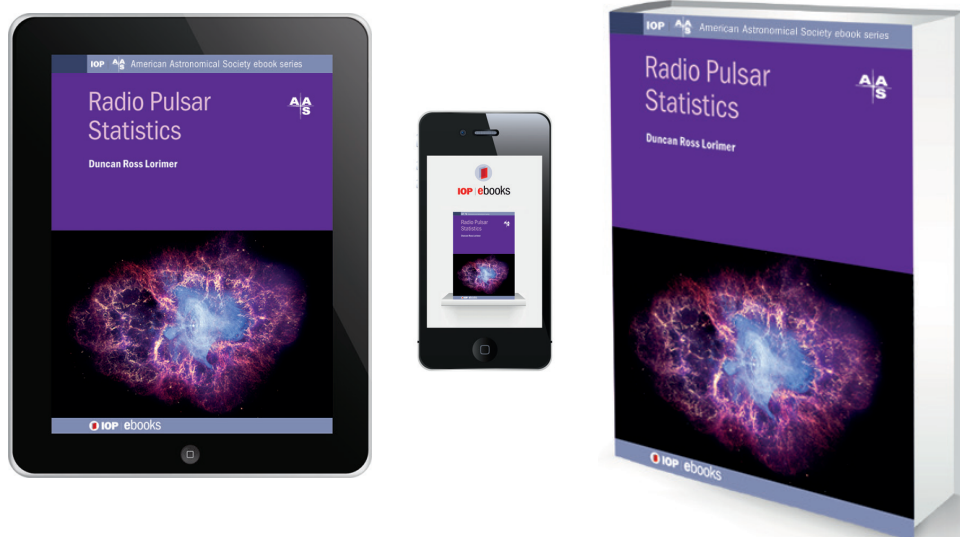

What are the benefits of AAS–IOP ebooks?

- **Fully integrated platform** – all AAS ebook and journal content in one place on *IOPscience*
- **No DRM** – designed specifically for electronic delivery we allow simultaneous access for all users
- **E-reader compatibility** – books and chapters are published in HTML, PDF, MOBI and EPUB 3 formats
- **Rapid publication times** – books will be published within four months of acceptance of final manuscript
- **Multimedia content** – becomes an integral part of the ebook

Interested in publishing with AAS–IOP ebooks?

If you are interested in being part of this unique collection we would like to hear from you. We welcome new book proposals in all branches of astronomy and are actively commissioning in these areas.

In the first instance, please submit a summary of your proposal, detailing the topic, concept, competition and potential audience to aas.ebooks@iop.org, including a current biography and contact details.
