

**TECHNOLOGICAL AND DIGITAL RISK:
RESEARCH ISSUES**

GEVISA LA ROCCA

JUAN MARTÍNEZ TORVISCO

EDITORS

Index

Preface

First Section Exploring the Edges of Risk

Chapter One

The Need to Take Risks. Outline of a Relational Approach

Gevisa La Rocca

1. Introduction
 2. Risk and communication in Luhmann: the “re-fero” dimension
 3. Antifragility and complex systems in Taleb: the “re-ligo” dimension
 4. Crisis and analytic dualism in social systems: the “re-latio” dimension
 5. Conclusions
- References

Chapter Two

Technological Risk: In the Light of the Psychometric Model

Juan Martínez-Torvisco

1. Introduction
2. The value of life
3. Constructionist approaches to risk
4. Defining the risks?
 - 4.1. *What do we mean when we say hazard?*
 - 4.2. *Difference between hazard and risk*
5. Technological risk
 - 5.1. *Technological risk research*
 - 5.2. *The controversies of the technological risk*
6. The technological risk analyzed under the psychometric model
 - 6.1. *The application of the psychometric model in technological risks*

References

Chapter Three

Online Networking and Risks for the Creation of New Cognitive and Social Boundaries *Inside and Outside* Organisations

Tiziana Ramaci and Monica Pellerone

1. Introduction
2. Social networks and virtual communication

3. “Virtual” informal processes and learning
4. Social organisation as an alternative way of doing business
5. Conclusions

References

Chapter Four

Social Representation Surrounding AI: Mapping Risks and Opportunities Throughout the European Commission Policies on Artificial Intelligence

Antonella Napoli

1. Introduction
2. The AI issue
3. Theoretical framework: the autonomous technology
4. Method and sample
5. Results
6. The technological risk: the decentralized human being and the ethics' choice
7. Conclusions

References

Second Section Technological and Digital Risks

Chapter Five

Who Bots There, Friend or Foe? The Rise of Social Bots on Digital Platforms

Marzia Antenore and Elisabetta Trinca

1. Introduction
2. Defining social bots and their buddies
3. Why are bots so challenging?
4. Bots renegotiate boundaries between humans and machines
5. Bots exploit social engineering and network shaping strategies
6. Bots exploit echo-chambers to manipulate opinion formation
7. Digital platforms empower social bots raising
8. Discussion and conclusions

References

Chapter Six

Cyberbullying: Technological Risk Among Adolescents

Eva Torralba, Jessica Ortega-Barón and Sofia Buelga

1. Introduction
2. Description of cyberbullying
 - 2.1. Definition of cyberbullying

- 2.2. *Characteristics of cyberbullying*
- 2.3. *Main types of cyber-aggressions*
- 2.4. *People involved in cyberbullying*
3. Prevalence of cyberbullying
4. Consequences of cyberbullying
5. Prevention of cyberbullying
6. Intervention in cases of cyberbullying

References

Chapter Seven

New Perspectives of Integrated Emotional Deviance on Cyberbullying Phenomenon

Mariangela D'Ambrosio

1. Introduction
2. The “emotional deviance” as a new sociological perspective
3. Cyberbullying and “emotional deviance”: a new sociological integrated perspective
4. Emotional work as a practice of behavioural regulation
5. “Dis-connection”, cyberbullying and emotional deviance: a reflection around children’s communicative-relational modes in the virtual world
6. Conclusions

References

Chapter Eight

The Digital World Between Risks and Opportunities: Ethical Dimension and Digital Skills

Stefania Capogna and Maria Chiara De Angelis

1. Introduction
2. From the risk to the idea of responsibility
3. The language of risk communication in educational context. Digital skills and social responsibility behaviour
4. Digital skill: the ethical issue
5. Teaching role in risk awareness
6. From digital innovation to social implications: the peer education model
7. Conclusions

References

Chapter Nine

Hate Speech Towards Migrants: The Risks and Consequences of Using Social Media

Giacomo Buoncompagni and Lucia D'Ambrosi

1. Introduction: migration and violence on social media
2. Methods
3. Violence and risk on Facebook and Twitter
4. Future perspective: technology as a support to information

References

Chapter Ten

How Technology Shapes Risk Perception. An Empirical Research Among American College Students

Veronica Moretti

1. When did American Universities become risky?
2. Risk and technology: the role of crime alerts
3. The empirical research
 - 3.1 *Mixing research techniques*
4. Dealing with numbers: which factors instigate/inhibit risk perception?
5. How does the perception of risk change among students? The Cluster analysis
 - 5.1 *The frat boy*
 - 5.2 *The new normal*
 - 5.3 *The tecno-prudent*
 - 5.4 *The fearful*
6. Discussion: the impact of technology on the clusters
 - 6.1 *What is gender?*
7. Conclusions

References

Chapter Eleven

Youth and Digital Media: Risks and Opportunities to Socialization, Sociability and Identity

Andrea Garavaglia, Maurizio Merico, Valeria Pandolfini, Chiara Pattaro and Francesca Setiffi

1. Introduction
2. Research design and methodology
3. Internet use and online activities among Italian high school students
4. Exploring teenagers' social capital: bonding and bridging mechanisms between online and offline contexts
5. The opportunities and risks of teenagers' online lives: what are the issues?
6. Who takes charge of media education?
7. Conclusions

References

Chapter Twelve

The Virality of Risk. When Young People Test their Limits Online

Gevisa La Rocca and Cosimo Miraglia

1. Introduction: man and the search for death
2. Risking to die for a game
3. The issues in the study of “dangerous games”
4. The video selection
5. Video analysis
6. Conclusions

References

Third Section Risk in the Cities

Chapter Thirteen

Risk Communication in Highly Polluted Areas

Liliana Cori and Fabrizio Bianchi

1. Introduction
2. Environment and health
3. Spotlight on epidemiology
- 3.1. *Health Impact Assessment: a preventive and protective tool*
4. Inside the body: HBM research
5. Communication in HBM research
6. The results of HBM studies
7. Recent developments
8. Conclusions

References

Chapter Fourteen

Perception and Communication of Environmental Risks In Big Cities

Eva Leticia Ortiz

1. Introduction
2. Theoretical references
3. International findings
4. Method
5. Procedure to select non-experts
- 5.1 *Procedure to select experts*
6. Architectural urban risks
7. Communication

8. Conclusions

References

Chapter Fifteen

From Chernobyl to Fukushima: From Known Structure-Based Risks to Climate Change as Risk Drivers of a Nuclear Accident

Marcella Giacomarra and Aldo Parlato

1. Introduction

2. International decommissioning funds to assist Bulgaria, Lithuania and Slovakia

2.1. *Bulgaria case study*

2.1.2. *Kozloduy international decommissioning support fund*

2.2. *Slovakia case study*

2.2.1. *Bohunice international decommissioning support fund (BIDSF)*

2.3. *Case study Lithuania*

3. Funding short fall: a risk for the completion of the decommissioning

4. Impacts on nuclear energy production in Lithuania, Bulgaria and Slovakia

5. Discussion and conclusions

References

Chapter Sixteen

The Impact of Criminal Risk Assessment on Urban Planning

Thea Giacobbe

1. Introductions: insecurity and cities

2. Crime and environmental design

3. And then?

4. Today: towards an integrated approach to urban security

References

Fourth Section Our Risk-Scape

Chapter Seventeen

Preparing the Risk-Scape: Three-Dimensional Interpretation

Gevisa La Rocca and Juan Martínez-Torvisco

1. Introduction

2. From studies to construction of retrospective sense-making

3. Exploring three-dimensional interpretation

4. Drawing the risk-scape
