

Dr. **Maite Alguacil** holds a PhD in Economics from the Universitat Jaume I. She began her doctoral studies at the University of Nottingham, obtaining the title of MSc in Econometrics and International Economics. Previously, she graduated in Economics and Business Administration at the University of Valencia. Currently, she is Associate Professor, Associate Researcher at the Institute of International Economics and Vice-Dean of the degree in Economics at the Universitat Jaume I. She has also been director of the Master in Economic Integration and International Trade. She has made numerous research visits in prestigious academic institutions, such as the University of Birmingham, the National University of Ireland, the Centre for Research in Economic Development and International Trade (CREDIT) of the University of Nottingham and the University of Göttingen. She has also been invited to present seminars at various European institutions, as the Centre for Economic and Regional Studies (Budapest), University of Reading, the University of St. Andrew or the University of Nottingham. She is a member of the research group in International Economy: Market Structure and Competitiveness, Trade and Mobility of Factors and of the Spanish Association of Economy and Finance (AEEFI). Her research interest focuses on the field of International Economics and particularly in topics related with trade and factor movements. Her most recent publications are devoted to different aspects of the location of heterogeneous firms, migration flows, and the international production networks. The result of this research has been published in journals of recognized international prestige.
