

Henry Ponce Rodríguez studied at Universidad Nacional Autónoma de Honduras. He obtained a degree in Chemistry and Pharmacy (July 2006). He completed the Official Master's degree in Applied Chromatographic Techniques from the Rovira i Virgili University, Spain (2013-2014), funded by a scholarship program for foreign students and a grant for academic activities aimed at supporting the teaching staff of the public universities.

In May 2017 he joined MINTOTA research group of the Analytical Chemistry Department (University of Valencia) as a PhD student in chemistry by grant of Doctorate Studies Program of the Universidad Nacional Autónoma de Honduras.

His research is based on the use of liquid chromatography miniaturized, including capillary and Nano chromatography, coupled to In-tube solid phase microextraction (IT-SPME) for the analysis of biological and environmental micro samples.

He is coauthor of 2 peer reviewed journals (both on review).
