

---

Lusine Hakobyan studied Pharmaceutical Chemistry at the State university of Erevan (Armenia 1998-2003). From 2003 -2006 she worked at the Institute of Biotechnology (Yerevan, Armenia) as senior research technician. As a result of his scientific work, has published 1 article and contributed in 1 scientific conference through oral communication. From 2004-2005 she worked at the Pharmacy Farm-Alians (Yerevan, Armenia) as a pharmacist.

She moved to Spain, where qualified the Degree in Chemistry - Pharmacy to the spanish title of Degree in Chemistry at the University of Valencia (in August 2015).In September 2015, she joined MINTOTA (research group, in the department of Analytical Chemistry at the University of Valencia) as a PHD student in chemistry, supervised by Prof. Pilar Campíns with Dra. Yolanda Moliner. Her current research is based on the study of new strategies of analysis in miniaturized techniques of liquid chromatography on line, also in the design of in situ analysis devices. As a result of his research she has published 3 articles (one of them in review). He has contributed in 8 scientific conferences of which 7 are international and one is national, presenting posters. Currently she is hired as a no doctor researcher.
