

---

Jorge Verdú-Andrés studied a Chemistry degree at the University of Valencia (1985-1990) and obtained a Ph. D. degree in the same university, with Extraordinary Award, in 1995. From 2003 he is Assistant Professor in the Analytical Chemistry Department of the University of Valencia, and has developed activities in the faculties of Chemistry, Pharmacy and Biology. He has also given lectures in postgraduate courses and in official masters such as Experimental Techniques in Chemistry or Workplace Safety. He participates in different educational innovation projects that are sponsored by the University of Valencia.

His research work has been developed mainly in the area of Chemometrics and liquid chromatography, in the research group MINTOTA lead by Prof. Pilar Campíns-Falcó. In 1996 and 1997 he did a postdoctoral stay at the Vrije Universiteit in Brussels in the group of Prof. Massart, with a postdoc grant from both the Spanish Ministry of Education and the European programme Marie Curie. At present, he is working on the development of methodologies for liquid, conventional and capillary chromatography for the environmental analysis.
