

Pilar Campíns-Falcó (Prof. P. Campins-Falco; WOK-Researcher ID: B-8943-2008 (Thomson Reuters). Other Names: Campinsfalco P; Falco PC; URL: <http://www.researcherid.com/rid/B-8943-2008>) got the BSc degree in Chemistry in the Faculty of Chemistry of the Universitat de València (1976-1981), and the Ph. D. in the same university (1985) with Doctorate Award. From January 2002, she is Professor of Analytic Chemistry in the Faculty of Chemistry in Universitat de València. She has given lectures in the Faculties of Chemistry, Biology, Pharmacy and in the Superior Technical School of Engineering at degree and postgraduate levels.

She has supervised fifteen research projects sponsored by public organizations in competitive announcements and related to clinic studies in drug design and tumor markers, as well as environmental studies as regards priority and emerging pollutants. The current projects deals with the design of new strategies for developing in situ cost-effective dispositives and capillary liquid chromatography and nanochromatography analyzers in order to monitorize and characterize the environment and human security .

She has contributed to the discipline by introducing new concepts about calibration, accuracy, and quality of the analytical results, multiresidue analysis and liquid chromatography. She is the leader of a consolidated research group “miniaturization and total methods of analysis” (MINTOTA: <http://www.uv.es/mintota>) created in 1988, and has established collaborations with other research groups of the Universitat de València, and with other Spanish and European universities, and develops activities dealing with knowledge and technology transfer with companies, autonomic organizations and research centres. She is co-author of more than 200 scientific publications, such as articles in specialized international magazines and different book chapters, and she has participated in numerous scientific congresses. She has co-supervised ten doctoral thesis. She has also experience on university management, and at the present moment. She is the Vice-rector of research of the University of Valencia from april 2014. She is a reviewer in JCR journals magazines of the discipline and evaluator of several quality agencies (ANECA, ANEP, AGAUR, ACECAU, AAC and AQUIB) and commissions.
