To open a call for the public offer of employment for several positions within this organisation with employment contracts in charge of several lines of research, as listed in the annexes of this resolution, in accordance with the following requirements:

One. General rules

1.1. The purpose of this offers is the selection of staff to fill several positions for several lines of research through the competition system.

1.2. In accordance with the provisions of Article 89 of Organic Law 2/2023, of 22 March, on the University System, this selection process must be carried out in accordance with the provisions of the aforementioned law and its implementing regulations.

The specific university regulations included in the Organic Law of the University System, the Law of Science and the Statutes of the Universitat de València, as well as in the regulations of this call, will also apply.

1.3. The selection processes for each call will be carried out through a competition that will consist of the evaluation of merits and an interview.

1.4. The allocation of positions to applicants who pass these selection processes will be carried out according to the order of points obtained, provided that they meet the requirements for each job position in the annex.

2.1. Be a Spanish national, a national of a member country or be from any of the states in which, by virtue of international treaties established by the European Union and ratified by Spain, free movement of workers applies in the terms by which this legislation is defined in the Treaty of the European Union. In this event, it is necessary to submit proof of having applied for an EU residence card.

Likewise, applicants of nationalities other than those mentioned above may apply and will only need to meet the requirements established in current regulations. Applicants who are

When qualifications have not been officially homologated or declared as equivalent, this requirement may be replaced by proof of having started the process for homologation or declaration of equivalence. The contract will be terminated if the competent academic authority denies homologation, understanding an application to be denied when it is conditioned to the fulfilment of certain requirements which have not been met.

Language courses will not be evaluated, only the levels attained.

2.5. Not suffer from illness or be affected by physical or mental limitations that are incompatible with the exercise of the relevant duties.

2.6. Not be suspended from exercising public functions, or have been dismissed from any administrative or public position through disciplinary proceedings. Failing this, a copy of an application for issuance must be provided, without prejudice to the sworn statement of the interested persons.

All these requirements must be met at the end of the application submission period and maintained during the selection process.

Applicants are responsible for the veracity of all the information stated in their application and the documentation provided, and may be liable in the event of falsehood, without prejudice to their exclusion from the selection process where relevant.

Project: «Análisis toxicometabólico e identificación de biomarcadores en lesión hepática idiosincrática inducida por fármacos usando células reprogramadas y vesículas extracelulares. (DILIMET). CPI-25-723», co-financed by the State Research Agency -AEI-

and by the Ministry of Science, Innovation and Universities, in charge of the research line: «Lesión hepática inducida por fármacos (DILI): mecanismos, susceptibilidad, biomarcadores y fenotipos clinic-patológicos».

Public offer of employment for a graduate researcher position.

1. General conditions of the position offered

1.1. Job title and classification:

Graduate Researcher.

Group: A

Subgroup: A1.

1.2. Working hours: 35 hours per week.

1.3. Provision of the grant: the purpose of this grant will be to fund the salary, among other items. The monthly gross salary, full-time, will be 1,651.13 euros (12 payments).

1.4. Functions and tasks to be carried out:

- Participate in experimental tasks focused on studying the mechanisms of drug-induced hepatotoxicity (DILI).

- Reprogram human fibroblasts using lentiviral systems to generate reprogrammed hepatocytes (HLCs), culture and maintain these cell models, and expose them to model drugs and analyze patient samples.

- Collaborate in performing toxicometabolomic analyses using mass spectrometry techniques (UPLC-MS/MS, GC-MS) as well as miRNAs analysis techniques for the identification of metabolites and miRNAs associated with drug-induced liver toxicity.

- Support the collection, isolation, and characterization of extracellular vesicles (HEVs) from plasma and HLC culture media using ultracentrifugation, size exclusion chromatography, and immunochemical techniques, as well as the implementation of methodologies for analyzing their protein and lipid composition.

- Contribute to the organization of biological samples, management and analysis of experimental data and preparation of results reports.

1.5. Purpose and duration: experimental development of reprogrammed hepatocyte cell models (HLCs), toxicometabolomics studies and characterization of biomarkers in extracellular vesicles of cell models and plasma of patients with drug-induced liver toxicity for the development of diagnostic tools.

The contract will be determined by the duration of the line of research and budgetary availability.

Once the duration of this first project or its budget availability has ended, the person who is awarded the place may join other projects belonging to the same line of funded research.

1.6. Requirements
