

APPENDIX 1.7.0

Type a11/b(1,2,3) \pm 6 \pm 8 \pm 10 \pm 12

A multicusp form with cusps of unequal size.

Tofino Basin subtype a11/

a11/b2/c2/d0/e1/f3/g1/h2/i4+8/j4 or

a3,4/b2/c2/d4+10/e2,3/f0/g0/h2/i1/j2+11/k3/l0/m0/n0 undescribed
elasmobranch dermal denticle or tooth, Form B

APPENDIX 1.7.1

Type a11/b(1,2,3) \pm 6 \pm 8 \pm 10 \pm 12

A multicusp form with cusps of unequal size.

c. Arrangement of projections (cusps): ^{9, 19, 31}

0. indeterminate ^{9, 19}

1. widely spaced ^{9, 19}

2. close together ^{9, 19}

d. Shape of base (root) from which cusps arise: ^{9, 19, 31}

0. indeterminate ^{9, 19}

1. none of the following ^{9, 19}

2. elongate and bar-shaped ^{9, 19}

3. flat and plate-like ^{9, 19}

4. circular to subcircular in outline, but not flattened ^{9, 19}

5. thick and polygonal ^{9, 19}

6. curved ^{9, 19}

7. circular to subcircular and flat with a button-like process ¹⁹

8. circular to subcircular and thick with a button-like process ¹⁹

9. flat and star-shaped ¹⁹

e. Shape of projections (cusps): ^{9, 19, 31}

0. indeterminate ^{9, 19}

1. triangular, not curved ^{9, 19}

2. triangular, curved lingually ^{9, 19}

3. triangular, curved laterally (mesially or distally) ^{9, 19, 31}

4. broad and blunt ^{9, 19}

5. none of the above ¹⁹

f. Number of projections (cusps) ^{9, 19, 31}

Recorded as numbers ¹⁹

g. Position of projections (cusps) ^{9, 19, 31}

0. indeterminate ^{9, 19}

1. linearly arranged ^{9, 19}

2. not linearly arranged ^{9, 19}

h. In linear forms, geometry of cusps ^{9, 19, 31}

0. indeterminate or none of the following ^{31, 32}

1. cusps of different sizes with no order to their distribution ^{9, 19}

2. medial cusp with lateral cusps decreasing in size from medial cusp to edge of element; symmetrical ^{9, 19}

3. medial cusp with smaller lateral cusps, one of lateral cusps larger than lateral cusp nearest medial cusp; symmetrical ^{9, 19}

4. posterior cusp largest, succeeding anterior cusps decreasing in size; asymmetrical ^{9, 19}

5. medial cusp smaller than lateral cusps; symmetrical ^{9, 19}

i. Crown labial surface features ³¹

0. indeterminate ³¹

1. absent (smooth) ^{31, 32}

2. lines or ridges multiple (greater than number of cusps), long (greater than 1/2 height of crown), and approximately vertical ^{31, 32}

3. lines or ridges multiple (greater than number of cusps), short (less than 1/2 height of crown), and approximately vertical ^{31, 32}

4. lines or ridges few (same as or less than number of cusps), long (greater than 1/2 height of crown), and approximately vertical ^{31, 32}

5. lines or ridges few (same as or less than number of cusps), short (shorter than 1/2 height of crown), and approximately vertical ^{31, 32}

6. one node below each cusp on crown shoulder ^{31, 32}

7. more than one node below each cusp on crown shoulder ^{31, 32}

8. prominent peg (protrusion) on crown shoulder below principal cusp ^{31, 32}

9. rounded protrusion (not prominent peg) on crown shoulder below principal cusp ^{31, 32}

10. Longitudinal line(s) or ridge(s) on and traversing lower crown shoulder, may be networked, may be discontinuous ³¹,
₃₂

- j. Crown lingual surface features. Refer to characteristics: “i” 0 to 10 (above) ³¹

Refer to characteristics: “i” 0 to 10 (above) ³¹
