

---

Carmen Molins-Legua obtained BSc degree 1989, and the Ph. D. degree in Chemistry in 1994, both at the Universitat de València. Her research work has been developed mainly in the area of liquid chromatography, in the research group MINTOTA lead by Prof. Pilar Campíns-Falcó. She got a postdoctoral grant in the Rijksinstituut voor Volksgezondheid en Milieu (Netherlands) during 1995 and 1996, and was supervised by Peter Van Zoonen. During her stage she worked in the field of Environmental Analysis. In 1999 she became Assistant Professor in the Analytical Department of the Faculty of Chemistry at the University of Valencia. In 2002 she conducted a stay with the professors S.Cosnier and C.Mousthy at the University of Grenoble. Currently, she is working on the design and development of devices for in situ measurement, and capillary liquid chromatography analyzers in order to monitorize and characterize the environment.
