

# HOW DO CHILDREN WITH ASC READ STORIES?

We are running an **eye tracking study** on reading comprehension in children and young people (age 10-16) with **Autism Spectrum Condition (ASC)**

Come along to London Road Campus, **University of Reading** during the summer holidays

**Get in touch!**

[i.fajardo@reading.ac.uk](mailto:i.fajardo@reading.ac.uk)

## WHY ARE WE DOING THIS?

- We're interested in how children and adolescents with ASC understand what they read. By tracking their eye movements, we can see exactly which words and phrases are particularly easy or difficult for them
- We hope our research will be useful for teachers and others who work with young people with ASC

## HOW DO I TAKE PART?

- If you would like take part, just get in touch with the research team by emailing Inmaculada Fajardo: [i.fajardo@reading.ac.uk](mailto:i.fajardo@reading.ac.uk)
- We will answer any questions you have and if you want to, make an appointment for you to come to the university

London Road Campus is located in central Reading, next to the Royal Berkshire hospital.
