SUMMARY

This course, situated within the scientific framework of Educational Theory, introduces teaching professionals to the different areas of Social Pedagogy. Key topics related to socio-educational action and intervention will also be covered, as educators must have training that enables them to operate from this perspective.

It should be noted that the course is divided into distinct sections: a conceptual approach to Social Pedagogy; the origin and historical evolution of Social Pedagogy; areas of intervention in Social Pedagogy; qualitative research in Social Pedagogy; and keys to designing a socio-educational project.

The course is presented from a theoretical, methodological, applied, and critical perspective, since all educational action is based on a dynamic social reality, and therefore educators must constantly question this situation and the group with which they work.

The aim is also to ensure that future educators, within the organization where they carry out their daily work, are capable of designing and implementing training programs for different audiences, combining their needs with those of the organization. Pedagogical action, teaching, and evaluation are also addressed. Guidelines are provided for program design in all areas of social education.

TEACHING METHODOLOGY

The methodology that will be carried out in this subject starts from the premise that the students are an active and fundamental part in the dynamics of the class.

Depending on the learning objectives, different methods will be used that will be specified in the different activities (lectures, practical sessions, tutorials, seminars, dialogical gatherings, etc.): expository methodology, cooperative work, group discussion, readings and individual essays, debates, practical and application activities both individual and group.

In the theoretical classes an expository and participatory methodology will be used with the application of group dynamics techniques.

The development of practical classes will be guided in a guide that will be made available to the students. Timely completion and presentation of the internship reports will be announced in advance.

Throughout the course, the student will compile a series of documents and make a series of readings and activities for the preparation and study of the subject; these documents, readings and activities must be specified and related in a didactic folder or portfolio that each student will deliver to the teacher, on the dates that are duly notified.

Team work. During the course of the course, the students will carry out a project on topics proposed by the teacher in any of the areas of Social Pedagogy. There will be a follow-up and orientation in group tutorials by the teacher. The project will be delivered in writing to the teacher and will be presented in class orally on the agreed date.

EVALUATION

1. Portfolio: Collection of evidence of completed work (based on class attendance, reflections on readings, seminar attendance, presentation of practical exercises, reports, essays, and, in general, the student's productions throughout their learning process).

2. Evaluation and presentation of a guided written assignment, taking into account (a) bibliographic and information search skills, (b) the timeliness of the work completed, (c) the organization of ideas and arguments expressed, (d) appropriate writing and presentation, (e) the originality, relevance, and interest of the topic.

3. Individual final written exam, which will assess (a) knowledge acquisition, (b) adequate comprehension, (c) presentation and argumentation skills, and (d) the ability to apply this knowledge to topics and problems in Social Pedagogy.

4. Final self-assessment by the student, which will assess autonomy and the self-critical capacity to judge one's own achievements.

General assessment criteria:

- ¿ Attendance at theoretical and practical sessions, seminars, and joint activities.
- ¿ Active participation, commitment, and interest.
- ¿ Conceptual mastery and precision.
- ¿ Clarity of presentation and ability to summarize.
- ¿ Structured, systematic, and documented presentation.
- ¿ Personal, critical, and substantiated elaboration of what has been learned.
- ¿ Correct grammar and spelling.
- ¿ Compliance with the deadlines set during the course.

REGULATIONS FRAUDULENT ACTS AND USE OF THE IAG

Fraudulent conduct in assessment tests and plagiarism in assessment work will be considered in accordance with the UV Assessment and Grading Regulations (ACGUV 108/2017) and the Protocol for Action against Fraudulent Practices (ACGUV 123/2020).

The use of technologies (including AI) to create assessment materials without prior and express authorization from the teaching staff will prevent them from being considered as self-authored and will be treated according to current regulations and the UV Code of Coexistence and Good Practices (ACGUV 300/2023, DOGV, no. 9747/18.12.2023).
