TEACHING METHODOLOGY

EVALUATION

The evaluation of the course is made up of two grades, both in the first and in the second call:

- Exam: at the end of the course, there will be a final test on all the contents of the subject, whether they have been taught in the classroom or not, and the materials that has been analyzed in the different sessions. This test will account for the 60 percent of the overall mark.
- Continuous evaluation: Throughout the semester practical work and complementary activities of various kinds will be carried out, which must be delivered on the day indicated by the professor. This part will have a value of up to 40 percent of the final grade.

In order to obtain points from the continuous assessment, the student must have attended a minimum of 75% of the sessions dedicated to 'practices'. In addition, in order to add the grade obtained in the continuous evaluation (of the practical sessions) to the grade in the exam, the student must have obtained at least a 4 (out of 10) in the exam.

The content of all the exercises done in the classroom also constitutes materials and contents of the course, so they are likely to be part of the end-of-course test. The teacher will explain how each exercise should be done and delivered. The results of these exercises will be delivered before the exam. The practices (whether those not carried out or delivered within the respective stipulated period, or those already carried out or evaluated) will not be recoverable after the delivery date, nor for the second call (keeping for this the note of the continuous evaluation achieved throughout the semester).
