## TEACHING METHODOLOGY

## EVALUATION

### The evaluation system

Each professor may indicate in the annex to his/her teaching guide the existence of any minimum requirement to pass the subject (either in relation to the global exam or to the continuous assessment). If no minimum requirement is established in the annex, it will be understood that there is no minimum requirement in the global exam or in the continuous evaluation to pass the subject.

A-Written and/or oral test(s), consisting of one or more exams that may be objective, include theoretical-practical questions and/or problems.

B- Continuous evaluation of each student, based on regular attendance and active participation in the proposed face-to-face activities, such as the practical realization or participation in workshops, the preparation and/or delivery of papers, reports and/or oral presentations on such activities, individually or collectively, all taking into consideration the degree of involvement and effort of the student in the teaching-learning process and the skills and attitudes shown during the development of such activities.

C- Continuous evaluation of each student, based on the student's attendance to seminars or visits to institutions; and, where appropriate, delivery of papers, reports, reports and/or oral presentations on the activity carried out, individually or collectively, all taking into consideration the degree of involvement and effort of the student in the teaching-learning process and the skills and attitudes shown during the development of such activity.

### Weighting

The overall test is to be valued between 50% and 70% of the final grade of the course, while the set of continuous evaluation activities is to be valued in the remaining proportion.
