SUMMARY

This course belongs to the module *Formació General Humanística* of the English Studies program. In this course, the student will be introduced to some major philosophical problems that have been object of reflection in the English-speaking countries at different historical periods. Student will learn about the major answers that these problems were given, and will be encouraged to develop their own thinking about the subjects.

PREVIOUS KNOWLEDGE**RELATIONSHIP TO OTHER SUBJECTS OF THE SAME DEGREE**

There are no specified enrollment restrictions with other subjects of the curriculum.

OTHER REQUIREMENTS**COMPETENCES / LEARNING OUTCOMES****1000 - Degree in English Studies**

Demonstrate, within the field of English Studies, an ethical attitude that focuses on aspects such as gender equality, equal opportunities, the values of the culture of peace and democracy and a sensitiveness regarding environmental problems and sustainability while, at the same time, knowing about and being able to appreciate linguist diversity and multiculturality.

Have and apply general knowledge in humanistic areas related to this field of study.

Interrelate different areas of humanistic studies.

Students must have the ability to gather and interpret relevant data (usually in their field of study) to make judgements that take relevant social, scientific or ethical issues into consideration.

Work and learn autonomously, and plan and manage ones workload.

Work in a team in contexts related to English Studies and develop interpersonal relationships.

DESCRIPTION OF CONTENTS

1. I. TOPICS FROM BRITISH EMPIRICISM

What follows is a list of the topics that may be addressed within this module. The exact list of topics will be provided in the specific syllabus of each group. For each topic a set of mandatory readings will be specified.

THE RENAISSANCE AND THE NEW SCIENCE. The Renaissance. History and Reason. The New Science: the Copernican Revolution and the Theory of Motion. A View about Knowledge and a World-View.

THE INNER AND THE OUTER. The Skeptical Argument: the Given. Impressions and the Content of Our Ideas. Primary vs. Secondary Qualities. The Inner and the Outer. Semantic internalism. The Explanatory Principle. The Absolute Conception of Reality.

THE EMPIRICIST SELF-DEMOLITION. Hume: The Idea of Causation and The Problem of Induction. Nelson Goodman: The New Riddle About Induction.

FREEDOM OF THE WILL. Am I free to choose what I will have for dinner tomorrow? How is freedom compatible with determinism? The different arguments for determinism. Hume's compatibilist position.

What follows is a list of the topics that may be addressed within this module. The exact list of topics will be provided in the specific syllabus of each group. For each topic a set of mandatory readings will be specified.

THE INDIVIDUAL AND HER SOCIETY. Hume: Reason and Passion, Morality as a Passion, Moral Relativism.

2. MORAL AND POLITICAL THOUGHT

What follows is a list of the topics that may be addressed within this module. The exact list of topics will be provided in the specific syllabus of each group. For each topic a set of mandatory readings will be specified.

John Rawls: Political Liberalism. Justice as Fairness. The Original Position. The Soldier's experience as a Challenge to Rawls' Original Position.

THE PURSUIT OF THE IDEAL. Berlin: values and their narrative discipline. Korsgaard: the need of principles to lead our lives. A challenge to Korsgaard on the basis of the narrative discipline of values. Berlin: there is no promised land because it is conceptually unintelligible.

UTILITARIANISM AND ITS CRITICS. What makes an action morally right or wrong? The Utilitarianist answer and its problems. Direct and indirect versions of Utilitarianism. The Utilitarianist tradition today: Peter Singer's arguments on famine relief. Bernard Williams' arguments against Utilitarianism

3. CONTEMPORARY THOUGHT ON HUMAN NATURE

What follows is a list of the topics that may be addressed within this module. The exact list of topics will be provided in the specific syllabus of each group. For each topic a set of mandatory readings will be specified.

THE SELFISH GENE. The plurality of species causally explained. The gen as the unit of survival. Mutation and selection. The individual and the gene. Evolution, war and obedience to the authority.

FAMILY AND GENDER ROLES. Topics from feminist thought. The sex-gender distinction. Different forms of discrimination against women. The domestic division of labour. The argument from nature. Feminist proposals for change.

SEXUAL ORIENTATION. What is a sexual orientation? What does it take to be homosexual or heterosexual? How many sexual orientations are there? Do people in any sense choose their sexual orientation? Social constructionism and biological realism about sexual orientations

RACE. What is a race? Are there any races? What does it take for a person to belong to one race or the other? Social constructionism and biological realism about race

WORKLOAD

PRESENCIAL ACTIVITIES

Activity	Hours
Theory	60,00
Total hours	60,00

NON PRESENCIAL ACTIVITIES

Activity	Hours
Attendance at other activities	0,00
Individual or group project	0,00
Independent study and work	75,00
Preparation of lessons	0,00
Preparation for assessment activities	15,00
Resolution of case studies	0,00
Total hours	90,00

TEACHING METHODOLOGY

Every unit will combine lectures of two kinds: (a) **Theoretically Oriented Lectures** where the relevant philosophical problems will be introduced. Students will be prompted to understand the significance and relevance of the issues independently of the more historical aspects. Whenever possible, the issues will be connected with examples and cases of ordinary life, and of our social context. The different authors and theories will then be introduced, but only after the students have acquired a sense of why they should care about the philosophical problems that those authors and theories address. (b) **Practically Oriented Lectures** where students will comment on different fragments of the mandatory readings.

Lectures of both kinds will be mostly expository, but they are also expected to be highly participative. Students are expected to make the mandatory readings before coming to class, following a schedule that will be provided by the lecturer. **A timely fulfillment of the reading requirements is essential for success in this course.**

Tutorials will be open to discuss any issues that may arise during the course. They will also be devoted to review the written exams done during the course. All students are strongly encouraged to review their exams, regardless of their score.

Students should devote at least five hours per week to do the mandatory readings at home. Do not be misled by the number of pages. In most cases, a proper understanding of the texts will require reading them at least twice.

EVALUATION

Evaluation methods

During the first three weeks of the term students will choose between two methods of evaluation: evaluation by exams, or evaluation by portfolio. In both methods the maximum score is 100% of the final

grade. The evaluation by exams consists in either one final end-of-term exam, or two partial exams. The evaluation by portfolio is based in one or several essays written by the student during the course under the supervision of the professor, and may include other sources of evidence, like presentations, tutorial interviews, and class participation. For both methods, a precise schedule with the different evaluation tasks will be provided at the beginning of the course in the specific teaching guide of each group.

The evaluation by portfolio is available only for the first call. Students who opted for evaluation by portfolio and did not pass the course in this first call will have to take the final exam for the second call.

Evaluation criteria:

In order to get the highest score, an exam or essay must provide evidence of the following items:

- That the student read and properly understood the required readings.
- That the student is able to explain an author's views in a orderly and enlightening way.
- That the student is able to apply the concepts and theories to new cases not previously discussed in class.
- That the student took the time to engage in a serious reflection on the topic and the readings discussed. These criteria and their application will be further explained to the students in class.

The ability to communicate at the B2+ (CEFR level) is required to pass the course as a whole. Students' whose written and/or oral communication display errors that are not consistent with the above level will fail the module regardless of their performance related to the course contents.

Plagiarism will not be tolerated; it is a serious academic offence. Any student who is found to have plagiarised will fail the whole subject.

Intellectual honesty is vital to an academic community and for the fair evaluation of the student's work. All work submitted in this course must be originally authored by every student. No student shall engage in unauthorized collaboration or make use of ChatGPT or other AI composition software.
