TEACHING METHODOLOGY

At the beginning of their fourth year, students will be assigned a tutor for their Degree Final Project. The distribution of themes and tutors will take place in a public meeting. Students will be ranked according to the average grade of their academic records. They will then choose a tutor. The Degree Final Project Committee will ultimately assign the subjects and tutors for the students's projects.

After the assignment, tutors will meet their assignees and will establish a work plan in accordance with the specific objectives of each project. The type and theme of the project must necessarily have the tutor's approval.

Each tutor will call **joint tutorials** in which they will explain the basic features of the projects and will establish their definitive themes. After that, the tutors will hold **individual tutorials** with the students in order to guide their investigation and to guarantee a personalised supervision of their Degree Final Project.

Students will submit a draft to their tutors, who will review and critically assess it. Following their tutor's comments and suggestions for changes, students will work on a final version, observing the presentation, style and typographical rules specified in *Guidelines for the Degree Final Project (Hispanic Studies)*, and also adjusting their work to the template that can be found in the UV virtual platform. Students will be allowed to submit their projects only with the approval of their tutors.

EVALUATION

Students must take into account that:

The Degree Final Project is written in normative Spanish and it will be evaluated by a board of three examiners (and a reserve member), one of whom might be the tutor. Preferably, the members of the board will do work on the thematic area of the project. Tutors will present the Degree Final Project Committee the nomination of the board of examiners, which must be definitely approved by the Committee.

After that, students will submit a printed copy of their project each member of the board, who will read and evaluate the project. Prior to this, students must fill in and submit a request form of the public defence and

evaluation of their projects to the Registrar's Office of the Faculty of Philology, Translation and Communication, together with an electronic version of their projects in PDF format, within the deadline established by the Faculty. The final mark will be obtained from the partial average mark given by each member of the board. For the evaluation of the project, the board will consider the following aspects:

- Presentation
- Structure and contents
- Bibliography
- The interrelation between objectives, methodology and final results.

Type of assessment	% of the final mark
Presentation	10
Structure and contents	50
Bibliography	10
The interrelation between objectives, methodology and final results.	30

To obtain a passing grade, students need to get at least a 50% of the final mark.
