SUMMARY

Taking advantage of the communicative competences attained by students in the two previous academic years, this subject intends to initiate them in the study of German Linguistics by means of introducing them to the most relevant aspects of morphology and syntax of contemporary German. Furthermore it pursues to acquaint students with different strategies for autonomous learning of previously acquired competences referred to the synchronic description of this language.

PREVIOUS KNOWLEDGE

RELATIONSHIP TO OTHER SUBJECTS OF THE SAME DEGREE

There are no specified enrollment restrictions with other subjects of the curriculum.

OTHER REQUIREMENTS

There are no restrictions to enrol in this subject.

Students are recommended to have attained at least a B2 level of German before starting this subject.

COMPETENCES / LEARNING OUTCOMES

TEACHING METHODOLOGY

The course will combine theoretical and practical classes:

(a) Theoretical classes: the contents to be developed in each of the subjects will be presented. The material presented by the lecturer will be available to students in Aula Virtual. The master class will be combined, especially in the introduction of new concepts, with reflection and discussion based on the presentation of practical cases.

(b) Practical classes: practical exercises will be carried out and corrected. The content of the different exercises and activities will be based on the theoretical content presented in class.

This course aims to contribute to achieving UNESCO Sustainable Development Goals 4 (quality education), 5 (gender equality) and 10 (reduced inequalities). To achieve this, part of the practical and discussion exercises will include contents related to these topics.

EVALUATION

The evaluation will consist of four distinct parts:

Evaluation method:	% of the final grade
Three written exams	60
An individual presentation	10
Active participation in class	10
Completion of the dossier of practical exercises	20

Total 100

Throughout the course, three written tests will take place: two devoted to the syntax section and one to the morphology section. To pass the course, the student must achieve 50% of the final grade, having obtained at least 50% in the section corresponding to the written tests (3 out of 6 points).

Students must give an individual presentation on one of the topics proposed by the lecturer at the beginning of the course. The presentation schedule will be provided when choosing the topics.

At the beginning of the course, the lecturer will leave in the Aula Virtual a dossier with obligatory written tasks related to the two content sections of the course. Throughout the semester, the deadlines for submitting these exercises will be set. They will always be delivered through the Aula Virtual.

For the second evaluation term, the results obtained in parts b) and c) will be kept. Part d) can be recovered up to 50% of its score corresponding to this block: up to point 1 out of 2. Part a) can be fully recovered and will be assessed through a single written test.

Intellectual honesty is vital in academic communities and for the fair evaluation of student work. All papers submitted in this course must be of original authorship. Papers that involve fraudulent collaboration or composition with the aid of artificial intelligence (ChatGPT or others) will not be accepted.

The general grading system will follow the regulations of the University of Valencia approved by the Governing Council on May 30, 2017. ACGUV 108/2017.
