SUMMARY

Accounting Standardization is an optional subject of the Degree in Business Administration and Management (GADE). It deals with the standardization process and the information regulations of societies at the international and national levels, focusing on aspects not analyzed in other matters. In particular in non-financial information and sustainability reports and in the accounting aspects of Spanish corporate regulations (capital law)

Accounting standardization is developed at an international level through organizations and processes that will be described and analyzed at the beginning of the subject. Specifically, the development of the subject then focuses on aspects related to non-financial information and sustainability in the first part, and on the accounting of companies or accounting of legal entities in the Spanish case in the second. Specifically, the accounting problems of capital companies since their inception with the foundation, then to consider capital increases and reductions. Debt operations without recourse to the banking system through the issuance of loans with debt securities are also studied. Merger and division operations of companies are also covered.

This subject allows students to acquire the necessary skills on the one hand to take on the challenge of the new rules related to non-financial information, and on the other for the accounting management of the most important corporate operations, which are those that occur when the strategic positions of companies are initiated or changed.

PREVIOUS KNOWLEDGE

RELATIONSHIP TO OTHER SUBJECTS OF THE SAME DEGREE

There are no specified enrollment restrictions with other subjects of the curriculum.

OTHER REQUIREMENTS

COMPETENCES / LEARNING OUTCOMES

1313 - Degree in Business Management and Administration
