SUMMARY

Spanish tax system is a 6 ECTS credit compulsory subject and together with *Corporate tax* is part of the area *Taxation* integrated in the Module *General Economic-Business Training* of the degree in Finance and Accounting.

The formative importance of the subject lies in its contribution to the general objective of the degree in Finance and Accounting to provide the future graduate with a solid formation in these subjects that will allow him to develop management tasks and financial and accounting advice in the business field.

Therefore, it is a professionally oriented training that allows students to join any financial, insurance, consulting and audit company in their administration department (accounting, finances, costs, treasury, risk analysis and management, investment analysis, taxes...).

In addition, we seek to train people who are professionals, business leaders or entrepreneurs who maintain the highest level of honesty, integrity and service to society which, ultimately, is the hallmark of a true professional.

The subject has great interest for the professional future. At a general level, it participates in the coverage of the basic knowledge necessary to achieve several professional profiles developed both in the field of

free practice of the profession and in private companies or financial sector companies.

Its location within the module, contributes to situate the study area in the economic and legal environment in which the company operates and with which it interacts, and allows to expand knowledge and general economic-business training that will be used transversely in later developments. In this line, the subjects of the module are linked to part of the contents that are taught in some of the subjects of other modules.

Specifically, this module aims to provide the student with a general training in economics and business that complements the most specific one in Finance and Accounting and provides a sufficient framework to understand the economic problems that currently face the Spanish and international economy.

The content of the subject will include: Public Sector financing, an introduction to the Spanish Tax System, emphasising the economic vision on the taxation of companies in relation to their creation, operation, succession and dissolution and, finally, taxes in Spain with special reference to Personal Income Tax and Value Added Tax, taking into account the taxation of the company and its impact on tax obligations related to those who develop economic activities.

PREVIOUS KNOWLEDGE

RELATIONSHIP TO OTHER SUBJECTS OF THE SAME DEGREE

There are no specified enrollment restrictions with other subjects of the curriculum.

OTHER REQUIREMENTS

No enrolment restrictions have been specified with other subjects of the curriculum.

COMPETENCES / LEARNING OUTCOMES

1315 - Degree in Finance and Accounting

Conocer el sistema fiscal español y, en particular, su aplicación a la empresa.

Conocer las obligaciones fiscales de la empresa, sea personal o societaria.

Conocer los aspectos básicos sobre el análisis y diseño de las decisiones estratégicas de la empresa.

DESCRIPTION OF CONTENTS

1. Introduction

1.1. Financing the public sector.

1.2. Basic elements of a tax.

1.3. Classification and types of taxes.

- 1.4. Ethics and taxation
- 1.5. The taxes in Spain.

2. The Value Added Tax: general system

- 2.1. Characterisation of the Value Added Tax. Taxable persons, impact and accrual.
- 2.2. What does the VAT tax? Subject operations and analysis of exemptions.
- 2.3. Who pays VAT?

- 2.5. How does VAT work? Analysis of the deduction and return mechanisms.

3. The Personal Income Tax. Introduction (PIT)

- 3.1. Characterisation of the PIT.
- 3.2. What does the PIT tax? Subject operations and analysis of exemptions.
- 3.3. Who pays PIT? Analysis of the concept of residence.
- 3.4. Other essential issues of the operation of the PIT.
- 3.5. Income components in the PIT
 - 3.5.1. Net income. Integral profits. Deductible expenses Characterisation of the reductions. Payments on account.
 - 3.5.2. Capital gains and losses. Specific rules. Payments on account.
 - 3.5.3. Income imputation. Real Estate income imputation.

4. Labour income in the PIT

- 4.1. Characterisation: The returns of labour income earned income.
- 4.2. Deductible expenses
- 4.3. Reductions
- 4.4. Payments on account

5. The income of the capital in PIT: Movable Capital

- 5.1. Characterisation of the returns of the Movable Capital.
- 5.2. Deductible expenses
- 5.3. Payments on account.

6. Income from capital in the IRPF (2): Real Estate Capital

- 6.1. Determination of Real Estate Capital yields.
- 6.2. Deductible expenses
- 6.3. Deductions
- 6.4. Payments on account.
- 6.5. Characterisation of the imputations of real estate income.

7. The income of the Economic Activities in the IRPF

- 7.1. Characterisation of Earnings from Economic Activities.
- 7.2. Different systems to calculate the Net Return of Economic Activities.
- 7.3. The Objective Estimate of the yields of Economic Activities.
 - 7.3.1. Annex I
 - 7.3.2. Annex II

8. Special VAT schemes

8.1. How do entrepreneurs determine VAT in Objective Estimation?

8.2. Other specific systems of VAT calculation

9. Gains and Losses of Capital in the Personal Income Tax

9.1. Characterisation and concept.

9.2. Payments on account.

10. PIT. Tax calculation (I)

10.1. Income classes.

10.2. Gross tax base and net tax base.

10.3. Personal and family minimum.

10.4. Procedure for calculating the total quota.

11. PIT. Tax calculation (II)

11.1. Calculation of the net tax payable.

11.2. The PIT tax credits. State tax credit. Regional Government tax credits.

11.3. The calculation of the final tax. Other tax credits.

12. The taxpayer unit in the PIT. Joint income tax return. Who is obliged to declare?

12.1. Individual tax return versus joint tax return. Types of family unit.

12.2. Opting for the joint tax return. Particularities of the joint tax return versus the individual one.

12.3. Who is required to file a tax return?

13. The Assistance Program for Tax Returns : Renta WEB

13.1. Operation of the program.

13.2. Practical case.

WORKLOAD

PRESENCIAL ACTIVITIES

Activity	Hours
Theory	30,00
Classroom practices	30,00
Total hours	60,00

NON PRESENCIAL ACTIVITIES

Activity	Hours
Attendance at other activities	2,00
Individual or group project	0,00
Independent study and work	50,00
Preparation of lessons	0,00
Preparation for assessment activities	3,00
Resolution of case studies	35,00
Total hours	90,00

TEACHING METHODOLOGY

During the course, the program contents will be covered, alternating theoretical material with exercises and practical case studies. Various tasks will be assigned, which students must submit in the way and by the deadlines specified throughout the course. To this end, all available resources (whiteboard, transparencies, computer, etc.) will be used as needed and deemed appropriate to ensure the successful achievement of the proposed objectives.

In general, classes will combine lecture-based methodology with problem-solving and practical activities. On the one hand, the instructor will highlight the key aspects of each topic and guide students' study through both required and supplementary readings, which must be consulted to fully understand and deepen knowledge of the subject. On the other hand, practical sessions will involve addressing questions and exercises related to the economic and legal fields, as well as resolving general-interest doubts arising from the teaching materials, recommended problems, and exercises. Students are expected to have reviewed and worked on these materials prior to each practical session, and to participate in the discussion of solutions and the essential aspects of the issues presented.

Teaching materials will be accessible through the virtual classroom at <http://aulavirtual.uv.es>.

EVALUATION

In order to evaluate the acquisition of contents and competences to be developed in the module, a diversified evaluation system will be used, selecting the most appropriate evaluation techniques, which allow to highlight the different knowledge and skills acquired by students while studying each subject.

The subjects that form this module will be evaluated based on the consideration of several aspects:

1. Written exam/s that assess the achievement of learning outcomes and, in particular, the specific competences of the subject regarding the content and its application.
2. The continuous evaluation of students, based on their participation and involvement in the teaching-learning process. This evaluation will include the attendance to class and the physical training activities, as well as the practical activities developed through the elaboration of individual or group papers / reports, both in written and oral form.
3. The attendance and participation of the student in the planned activities will be a basic requirement to be evaluated.

Based on the foregoing, the evaluation will be carried out by applying the following general criteria:

General criteria

The subject will be evaluated through tests (essay, objective and oral) and through observation techniques:

1. Written exams that will consist of theoretical and practical questions (a maximum of 70% of the final grade).

The grade 5 out of 10 must be exceeded in this written test, so that it can be added to the rest of the grade.

2. In the exam of this subject, the legislation corresponding to the subject may be used, but annotations may not be incorporated into it. In case of failure to comply with this rule, the exam will be considered failed.

3. Evaluation of the practical activities developed by the student during the course, from the preparation of papers, oral presentations and problem solving.

The activities designed to be presented or corrected in class will not be recoverable.

For the evaluation of the proposed activities and tasks, they must be delivered on the date and manner stipulated for each one of them.

4. Continuous evaluation of the student, based on their participation and involvement in the teaching-learning process.

The grade derived from points 2 and 3 will be a minimum of 30% of the final grade.

Observation techniques will allow to evaluate students ability to work as a team, argue and defend ideas, as well as their attitudes according to criteria of equity, equality and respect for human rights.

5. To pass the subject it will be necessary to obtain a minimum grade of 5 out of 10.

6. The student who has not passed the continuous assessment tests, may take the final exam of the subject (70% of the total grade).

7. In the final grade the teacher reserves the right to assess the work of the student throughout
