SUMMARY

In the subject Message and Media Planning, three basic aspects will be analysed: media selection criteria; strategy and media plan; and analysis of advertising formats and media characteristics. The first part, called Selection Criteria of media, is broken down into four themes whose purpose is to analyse the nature of media planning and its link with the campaign of communication, to subsequently enter the qualitative, audience, economic and efficiency criteria in the choice of media. The second part, called Analysis of the advertising formats and characteristics of the media, covers two topics, and focuses on exclusive in the study of advertising in each of the media, analysing the characteristics from the point of view of its advertising use, its commercial formats and commercialization. The third and last part is configured by a set of tools of communication that we have grouped under the name Strategy and media plan; specifically, the student will be introduced in the field of the planning approaches and, in a prominent way, in the planning programs and, particularly, in the TOM-Micro. It is, in definitive, to familiarize the student with certain computer tools such as the TOM-Micro, of which there is already an agreement with the owners, Odec, S.A. for use on the basis of data from the audience study of the Association for Media Research Communication, AIMC. Finally this part concludes with the media planning strategy.

The purpose of this subject is to specialize the student in the field of media. It consists of the theoretical-practical study of the audience habits and the characteristics of the media as a basis for advertising based on your objectives and budget constraints.
