SUMMARY

The Master's Final Project consists of the completion of an individual project by the student, adopting a multidisciplinary approach to marketing decision-making within a specific industry, sector, or company.

The project will be supervised by an assigned tutor and publicly presented for evaluation by an academic committee.

Through this project, the student must demonstrate their ability to assimilate the knowledge acquired throughout the program and to apply it in a practical manner. This application will generally take the form of a Marketing Plan for a specific company, although there is also the option to carry out a research-based project.
