SUMMARY

The Maste's Final Project (6 ECTS) includes bibliographic and/or laboratory work and the writing of the final thesis. The Thesis will include Introduction, Background, Material and Methods, Results, Discussion, Conclusions and Bibliography. The content will cover a parasitic disease or aspect of it, and will be supervised by one or two lecturers involved in the teaching of the Master course. It can be compiled either at University of Valencia or at other Spanish or foreign institutions. In the latter cases, besides the director, a local tutor & directly linked by Internet- will be appointed, who is to check the daily tasks of the student. Thus, a certificate of the tutor(s) and or director(s) verifying that the TFM was written/compiled under his/her supervision will be issued. The final report may be written in Spanish, Valencian or English. This kind of Thesis follows international standards.

The Virtual Classroom of the subject includes information corresponding to: a) research topics and tutors; b) the formal characteristics that the memory of the Master's Final Project must have; c) the deadline for delivery of the report, and the place and dates of the public reading act.

PREVIOUS KNOWLEDGE

RELATIONSHIP TO OTHER SUBJECTS OF THE SAME DEGREE

There are no specified enrollment restrictions with other subjects of the curriculum.

OTHER REQUIREMENTS

The submission of the TFM requires the prior passing of the compulsory core subjects of the Master's degree (40349, 40350 and 40351).

COMPETENCES / LEARNING OUTCOMES

-

Adquirir los instrumentos para poder planificar, ordenar y encauzar actividades de manera que se eviten en lo posible los imprevistos, se prevean y minimicen los eventuales problemas y se anticipen sus soluciones.

Be able to integrate into teams, both as managers or coordinators and for specific and limited functions and in support of the team or of others.

Conocer y usar con fluidez las categorías, prescripciones y procedimientos relevantes para cada caso y sus antecedentes y soluciones más significativas.

Contemplar en conjunto y tener en cuenta los distintos aspectos y las implicaciones en los distintos aspectos de las decisiones y opciones adoptadas, sabiendo elegir o aconsejar las más convenientes dentro de la ética, la legalidad y los valores de la convivencia social.

Elaborar y manejar los escritos, informes y procedimientos de actuación más idóneos para los problemas suscitados.

Know how to work in multidisciplinary teams reproducing real contexts and contributing and coordinating their own knowledge with that of other branches and participants.

Participar en debates y discusiones, y ser capaces de resumirlos y extraer de ellos las conclusiones más relevantes y aceptadas por la mayoría.

Proyectar sobre problemas concretos sus conocimientos y saber resumir y extraer los argumentos y las conclusiones más relevantes para su resolución.

Ser capaces de obtener y de seleccionar la información y las fuentes relevantes para la resolución de problemas, elaboración de estrategias y asesoramiento a clientes.

Ser capaz de asumir cualquiera de las tareas y responsabilidades relacionadas con las enfermedades parasitarias humanas: preparación práctica y formación teórica actualizadas de sanitarios para desempeñar trabajos, funciones y cargos de todo tipo y nivel en el amplio campo de la lucha, control, diagnóstico, difusión, enseñanza y estudio de las enfermedades parasitarias en todo el mundo.

Students should apply acquired knowledge to solve problems in unfamiliar contexts within their field of study, including multidisciplinary scenarios.

Students should be able to integrate knowledge and address the complexity of making informed judgments based on incomplete or limited information, including reflections on the social and ethical responsibilities associated with the application of their knowledge and judgments.

Students should communicate conclusions and underlying knowledge clearly and unambiguously to both specialized and non-specialized audiences.

Students should demonstrate self-directed learning skills for continued academic growth.

Students should possess and understand foundational knowledge that enables original thinking and research in the field.

Use different presentation formats (oral, written, slide presentations, boards, etc.) to communicate knowledge, proposals and positions.

DESCRIPTION OF CONTENTS

1. Master Final Project (6 ECTS)

The topic of the Master's thesis will be decided jointly by the student, their tutor (if applicable), and their supervisor(s). The topic will always focus on one or more aspects of a parasitic disease, parasite, or vector of interest.

It involves conducting research in a specific area of research belonging to the research group of which the tutor is a member and which the student will be part of, as well as writing a dissertation with all its contents. The Master's thesis will conclude with the presentation and defense of the work in a public event before a panel of faculty members.

WORKLOAD

PRESENCIAL ACTIVITIES

Activity	Hours
Attendance at supplementary activities	0,00
Monitoring and tutoring of the master's thesis	0,00
Presentation and defence of the master's thesis	4,00
Total hours	4,00

NON PRESENCIAL ACTIVITIES

Activity	Hours
Independent preparation of the master's thesis	22,00

Preparation of the master's thesis project	124,00
Total hours	146,00

TEACHING METHODOLOGY

Use of individualized methodology and adapted to the student. The director, through discussion of topics, recommendation of readings, participation in support activities, in forums for debate and presentation of contributions, specific methodology courses, coordinates and guides the student's training to acquire the tools of the research activity.

EVALUATION

A **court** consisting of the three lecturers of the Master will review the final written report, its oral presentation and defence:

- The evaluation will be made by analysis of the value of a final **written report** (50%).
- Oral presentation** and defence (50%).

The TFM cannot be presented without having passed the mandatory theoretical modules.

The copy or manifest plagiarism of any task that is part of the evaluation will imply the impossibility of passing the subject, then submitting to the appropriate disciplinary procedures.

Please note that, in accordance with Article 13. d) of the University Student Statute (RD 1791/2010, of December 30), it is the duty of a student to refrain from using or cooperating in fraudulent procedures in the evaluation tests, in the works carried out or in official documents of the university.
