TEACHING METHODOLOGY

To achieve the objectives of this subject, an interactive and theoretical-practical methodology will be used. A critical approach to the theoretical topics provided will be encouraged.

Academic practice in this subject is structured on several levels:

In-class activities.

Theoretical-practical classes.

Theoretical-practical in-class classes in which the contents of the subject will be worked. These contents will also be discussed and different activities will be carried out using various teaching resources.

Group work.

The purpose of carrying out works is to highlight the importance of cooperative work and reinforce learning, in addition to initiating the student in the activity of investigation, analysis and internalization of information, fostering personal relationships, and sharing situations to get closer to the contents and to the debate.

The students will do search-work in small groups that will be guided and supervised by the teacher.

Tutorials.

The individual and collective tutorials will serve to coordinate students in individual and group tasks, as well as to evaluate individual progress, activities and teaching methodology.

The tutorials will also be used to monitor oral expression, essential to pass the subject.

Evaluation.

Oral and written tests for the evaluation of the theoretical-practical contents, self-evaluation and

presentation of individual and group works.

Non-presential activities

Autonomous study and work

Preparation of the assigned tasks (summaries, critical reviews, etc.) and carrying out the specific guided work. The student will focus on the search, the location, the analysis, the manipulation, the elaboration and the return of the information.

EVALUATION

The evaluation of the subject will be evidenced in the first call by means of:

- Attendance and participation in 80% of the face-to-face sessions and delivery of the activities proposed in these. This participation will be essential to pass each of the blocks of the subject.
- Completion of at least one individual test (oral and/or written) or a paper for each of the blocks of the subject, which will give 60% of the grade.
- Completion of the preparatory activities in the classroom sessions, which will award 40% of the final grade (non-recoverable activity).

To pass the subject it is necessary to pass each and every one of its parts, namely AEM1, AEM2 and AEM3.

The evaluation of the subject will be evidenced in the second call by means of:

An individual test on the contents of the recoverable part of the subject, which will be graded with a maximum of 6 out of 10.

This course has an attendance requirement in order to be eligible to sit the first examination session (Article 6.9). Students will have fulfilled this requirement if they attend at least 80% of the hours scheduled for this activity and have duly justified their inability to attend the remaining sessions due to force majeure. The attendance requirement is a non-recoverable activity.

Students are advised to follow the document "Guide for the Responsible Use of Artificial Intelligence (AI) in Teaching and Assessment Activities at the University of Valencia, Faculty of Teacher Training":

https://www.uv.es/magisdire/Calidad/Guia_actuacio_IA_UV_FFP.pdf

The general grading system will follow the regulations of the University of Valencia approved by the Governing Council on 30 May 2017 (ACGUV 108/2017).

Teaching staff will allocate time during the final face-to-face sessions of the course for students to complete the institutional teaching evaluation surveys.

Any type of plagiarism in assignments or tests will result in failure of the subject. The improper use of artificial intelligence tools may be sanctioned in accordance with article 15 of the Reglament on evaluation and qualification of the University of Valencia. Students retain the intellectual property rights to all work they produce. Any reproduction or use of such work by teaching staff requires the students' informed consent.
