SUMMARY

The Strategy and Organizational Design in Tourism Companies course aims to introduce students to the area of strategic management that focuses on the implementation of business strategy. That is, the area of strategic design or organizational structure of the company and its relationship to strategy, strategic planning and control systems, and human resource management.

Within organizational design, special attention will be paid to aspects related to design variables (jobs, coordination, and decentralization), contingency factors (size, environment, technology, and power), and types of organizational structures.

In the planning and control systems section, the concepts, characteristics, and different types of these systems used by organizations are analyzed. Information and communication systems are also studied.

Within the human resource management section, the different types of human resource policies in companies are studied, namely selection and recruitment, training and indoctrination, and motivation.

TEACHING METHODOLOGY

The teaching methodology will be based on the case study method, meaning we will draw conclusions that will address theoretical aspects of the subject through the study and resolution of practical cases from real companies in the tourism sector. We will also feature seminars taught by industry professionals. These seminars will include an open question period at the end of the seminars, with the aim of addressing any questions they may have regarding the case presented by the professional.

EVALUATION

SE1 - Written and/or oral exams, consisting of one or more exams that will include both theoretical and/or theoretical-practical questions and/or problems. At least one exam will be given at the end of the semester, which will account for 40% of the grade.

SE2 - Assessment of practical activities based on the completion of assignments/reports and/or oral presentations. Students will submit a report on their resolution the week following the completion of each practical case, which will account for 40% of the final grade for the course.

SE3 - Continuous assessment of each student, based on regular attendance at classes and in-person activities, participation, and the student's level of involvement in the teaching-learning process.

The professor will individually monitor each student's participation in class. This will account for 20% of the final grade.
