SUMMARY

PREVIOUS KNOWLEDGE

RELATIONSHIP TO OTHER SUBJECTS OF THE SAME DEGREE

There are no specified enrollment restrictions with other subjects of the curriculum.

OTHER REQUIREMENTS

COMPETENCES / LEARNING OUTCOMES

-

Act autonomously in learning, make informed decisions in different contexts, issue judgements based on

experimentation and analysis and transfer knowledge to new situations.

Act autonomously in learning, make informed decisions in different contexts, issue judgements based on experimentation and analysis and transfer knowledge to new situations.

Analizar críticamente los cambios sociales y su impacto en los diferentes grupos sociales, para el diseño de contextos y nuevos espacios de intervención eficaces.

Apply models, methods and techniques of social work in interventions with individuals, groups, families and communities, in resolving problems within complex and multidisciplinary contexts.

Apply scientific and professional documentation sources, considering the use of new technologies.

Be able to communicate effectively, both orally and in writing, adapting to the characteristics of the situation and audience.

Be able to provide guidance in conflict and crisis situations. Enable the process of identifying problems and subjectively and collectively reconstruct situations and processes that generate suffering or significant difficulties for families.

Collaborate effectively in work teams, taking on responsibilities and leadership roles and contributing to collective improvement and development.

Contribute to the design, development and implementation of solutions that respond to social demands, considering the Sustainable Development Goals as a reference.

Contribute to the design, development and implementation of solutions that respond to social demands, considering the Sustainable Development Goals as a reference.

Define professional career paths and employment opportunities related to social work with families, minors and youth, and people requiring support.

Demonstrate critical and self-critical reasoning in the field of the degree, considering aspects such as professional ethics, moral value and the social implications of the different activities carried out.

Desarrollar la capacidad para analizar nuevos problemas de forma rigurosa y sistemática.

Describe strategies for disseminating and transferring research results and the systematisation of social work practice with families, minors and youth and in family care for people requiring support.

Design and develop processes of applied research and systematisation of professional practice in social work in the family sphere, applying suitable research methods and techniques to generate useful knowledge in family intervention.

Design research and/or intervention projects in social work within the spheres of family, minors and youth and in family care for people requiring support.

Determine the ethical implications arising from social work intervention in the spheres of family, minors and youth and in family care for people requiring support.

Establish a gender perspective in the processes of intervention and research in the context of social work.

Identify emerging challenges in social work within the spheres of family, minors and youth, and in family care for people requiring support.

Identify the needs for knowledge production in social work practice with families, minors and youth, and in family care for people requiring support.

Know and understand, within the area of the degree, inequalities based on sex and gender in society; integrate different needs and preferences based on sex and gender into the design of solutions and problem-solving.

Profundizar en el conocimiento de la complejidad y la diversidad de formas de vida y de vínculos en las familias.

Propose creative and innovative solutions to complex situations or problems within the field of knowledge to respond to diverse professional and social needs.

Propose creative and innovative solutions to complex situations or problems within the field of knowledge to respond to diverse professional and social needs.

Reflexionar, seleccionar e integrar críticamente los conocimientos teóricos adecuados para la comprensión de las características de la realidad concreta en la que se interviene con familias.

Saber incorporar la perspectiva de género en la planificación de las políticas de igualdad y antidiscriminatorias y, en las intervenciones sociales.

Saber orientar en situaciones de conflicto y crisis. Hacer posible el proceso de identificación de problemas, y reconstrucción subjetiva y colectiva de situaciones y procesos que generen sufrimiento o dificultades significativas a las familias.

Students should apply acquired knowledge to solve problems in unfamiliar contexts within their field of study, including multidisciplinary scenarios.

Students should demonstrate self-directed learning skills for continued academic growth.

Understand and comprehend, from the field of study, inequalities based on sex, gender and other axes of discrimination in society; integrate different needs and preferences in the design of solutions and problem-solving, considering these axes of discrimi

Understand the ethical implications of research or the systematisation of practice.

Use strategies for disseminating and transferring research results and systematisation of social work practice in the field of social work with families, minors and youth, and in family care for people requiring support.
