COORDINATION

PARDO PEREZ FRANCISCA

SUMMARY

The subject **business combinations and consolidation** studies the accounting treatment of business combinations, i.e. corporate transactions such as acquisitions, mergers and divisions. It also provides the concepts and techniques necessary for the consolidation of the financial statements, that is, the presentation of the annual accounts of corporate groups.

The **faculties in charge** of teaching in this subject are:

Dr. Francisca Pardo Pérez, Departamento de Contabilidad.
Mr. Vicente Rodríguez Collell, Auditor ROAC, RC Asesores Legales y Tributarios.

PREVIOUS KNOWLEDGE**RELATIONSHIP TO OTHER SUBJECTS OF THE SAME DEGREE**

There are no specified enrollment restrictions with other subjects of the curriculum.

OTHER REQUIREMENTS

No other requirements are described.

COMPETENCES / LEARNING OUTCOMES

2206 - Master's Degree in Accounting, Auditing and Management Control

Capacidad de adaptación a nuevas situaciones y de resolución de problemas.

Capacidad de búsqueda de información, análisis y síntesis.

Capacidad de organización y planificación del trabajo y los recursos.

Have critical and self-critical capacity.

Ser capaces de entender la información financiera empresarial individual y consolidada en España y conocer el efecto que sobre la información financiera tiene la diversidad contable internacional. Interpretar adecuadamente las fortalezas y debilidades de las empresas partiendo del estudio de la información financiera y del entorno en el que opera la empresa. Realizar diagnósticos financieros. Presentar un informe profesional partiendo del análisis de la situación financiera de las empresas españolas. Saber utilizar los estados financieros emitidos por las empresas para tomar decisiones económicas en una amplia variedad de situaciones referidas a su negocio.

Students should apply acquired knowledge to solve problems in unfamiliar contexts within their field of study, including multidisciplinary scenarios.

Students should be able to integrate knowledge and address the complexity of making informed judgments based on incomplete or limited information, including reflections on the social and ethical responsibilities associated with the application of their knowledge and judgments.

Students should communicate conclusions and underlying knowledge clearly and unambiguously to both specialized and non-specialized audiences.

Students should demonstrate self-directed learning skills for continued academic growth.

Students should possess and understand foundational knowledge that enables original thinking and research in the field.

DESCRIPTION OF CONTENTS

1. Business combinations.

1. Concept and types of business combinations.
2. Accounting policies.

3. Business combinations and accounting information

2. Acquisition method.

1. Acquirer.
2. Acquisition Date.
3. Cost of business combination.
4. Recognition and measurement of identifiable assets acquired and liabilities assumed.
5. Determination of the amount of goodwill or negative difference.
6. Provisional Accounting.
7. Business combinations stages.
8. Reverse acquisitions.

3. Mergers.

1. Concept, legal requirements and effects of mergers.
2. Process steps and calculations involved.
3. Accounting for mergers.
4. Treatment of cross-shareholdings.
5. Mergers under common control.

4. Other forms of corporate restructuring: Demergers.

1. Concept and types of excision.
2. Procedures, rules and methods.
3. Valuation and accounting.

5. Groups of companies and consolidation.

1. The concept of group of companies: the subjects of consolidation.
2. Standards for the preparation of the consolidated financial statements.
3. Other types of companies: joint ventures and associates
4. Obligation to prepare consolidated accounts and exceptions.
5. Set consolidated and consolidated.

6. Methods of consolidation and equity method.

1. Consolidation process.
2. Consolidation method: Phases and eliminations.
3. Proportionate consolidation method.
4. Equity method.

7. Changing investment and/or percentage of participation.

1. New investments in a subsidiary.
2. Proportional subscription in a capital increase.
3. More than proportional subscription in a capital increase.
4. Increase the percentage without additional investment.
5. Loss of percentage due to the share sale.

8. Indirect control and reciprocal investments.

1. Indirect control.
2. Elimination-equity investment stages.
3. Acquisition of shares of the parent company.
4. Cross shareholdings among subsidiaries.

9. Annual accounts in foreign currency.

1. Functional currency and reporting currency.
2. Conversion of financial statements in foreign currency.
3. Conversion of financial statements in hyperinflationary economies.

10. Tax effect on consolidated financial statements.

1. Taxation for corporate groups.

2. Tax effect on consolidated accounts of individual taxation.
3. Tax effect on tax consolidation regime.

WORKLOAD

PRESENCIAL ACTIVITIES

Activity	Hours
Theory	45,00
Total hours	45,00

NON PRESENCIAL ACTIVITIES

Activity	Hours
Attendance at other activities	11,00
Individual or group project	5,00
Independent study and work	6,00
Preparation of lessons	42,00
Preparation for assessment activities	3,50
Resolution of case studies	0,00
Total hours	67,50

TEACHING METHODOLOGY

MD1 - Group learning with the teacher. We use the model masterclass in lectures, offering the possibility to influence the most important of each theme, master exposure time, and present a specific way of working and dealing with different concepts. The participatory model will also be used in some theoretical issues and especially in practical classes, which is to prioritize communication between students and the teacher. The practical sessions will take the case method as a model because it encourages student participation both individually and as a group.

MD2 - Individual study. The student is directed in learning-oriented activities, so that student activity focuses on research, location analysis, handling, processing and return of information. The preparation work for the study of the subject will focus on it.

MD3 - Tutoring. Both individually and in groups to solve problems and direct jobs. You can use the platform "Aula Virtual" of the University of Valencia to maintain contact with the teacher.

MD4 - Group work with peers. The performance of work aims also to motivate the student in the research activity, apprehension and analysis of information, foster personal relationships, share problems, initiatives and solutions to work together. You will need to submit the proposed class work.

EVALUATION

The assessment systems for each part of the subject and their weighting are as follows:

SE1 - Class participation (individualized assessment activities, problem solving, presentation of works, among others): weighting 20%.

SE3 - Exam or test equivalent theoretical-practical character: weighting 80%. To pass the course, you must obtain a grade of at least 5 points on the exam.

Due to their characteristics, continuous assessment activities are not recoverable in this subject.

The student's final grade will be obtained as the sum of the continuous assessment's grade and the final exam's grade, under the requirement that final exam is passed. If the final exam is not passed, the maximum grade will be 4.
