SUMMARY

The objective of the course is to broaden students' knowledge of the economic environment in which the firms' productive activity takes place. In this respect, the analysis of the international economic context and the trends in globalisation and European integration are relevant. Regarding the latter, the European institutional system and several Community policies are studied, with special emphasis on macroeconomic policies within the framework of the European Monetary Union. Secondly, the competitiveness of an economic environment and its determinants are deeply analysed. Finally, the course deals with the analysis of the labour market from the perspective of economic analysis.

PREVIOUS KNOWLEDGE**RELATIONSHIP TO OTHER SUBJECTS OF THE SAME DEGREE**

There are no specified enrollment restrictions with other subjects of the curriculum.

OTHER REQUIREMENTS

In order to achieve learning outcomes, students who do not come from degrees in the field of economics, business or whose professional experience does not reach these issues must cover some training complements, which will be specified throughout the course. This training will be obtained through students' autonomous work and, if necessary, mentoring sessions.

COMPETENCES / LEARNING OUTCOMES

2212 - Master's Degree in Business Management. MBA

Students should apply acquired knowledge to solve problems in unfamiliar contexts within their field of study, including multidisciplinary scenarios.

Students should communicate conclusions and underlying knowledge clearly and unambiguously to both specialized and non-specialized audiences.

Students should demonstrate self-directed learning skills for continued academic growth.
