COMPETENCES / LEARNING OUTCOMES

2258 - Master's Degree in Digital Society

Acquire and demonstrate advanced knowledge of the principles and applications of artificial intelligence and its influence on the digital society.

Be able to communicate effectively, both orally and in writing, adapting to the characteristics of the situation and the audience.

Be able to evaluate the impact of digital policies and practices, selecting the appropriate theoretical perspective and the precise methodology to design and present intervention proposals.

Be able to participate effectively in debates and discussions in the field of digital sociology, demonstrating effective communication skills, critical thinking and respect for diverse opinions.

Collaborate effectively in work teams, assuming responsibilities and leadership roles and contributing to collective improvement and development.

Demonstrate a thorough and well-founded understanding of the theoretical and practical aspects of changes in the labour, cultural, communication and educational environment influenced by digital transformation.

Design research projects in the field of digital society, using advanced social research techniques.

Develop the ability to work in multidisciplinary teams and digital environments, taking responsibility for professional development and specialisation in this field of study.

Integrate knowledge of economics, law, communication, culture and sociology to address interdisciplinary problems in the context of the digital society and be able to convey research findings clearly and unambiguously.

Learn autonomously, making informed decisions in different contexts, making judgements based on experimentation and analysis and transferring knowledge to new situations.

Prepare reports, communications and technical opinions to communicate them to both specialist and lay audiences.

Propose creative and innovative solutions to complex situations or problems specific to the field of knowledge, to respond to diverse professional and social needs.

Understand and demonstrate detailed knowledge of advanced social research techniques applied to the study of the digital society, including the use of big data, social network analysis and digital methodologies.

DESCRIPTION OF CONTENTS

WORKLOAD

PRESENCIAL ACTIVITIES

Activity	Hours
Internship	90,00
Total hours	90,00

NON PRESENCIAL ACTIVITIES

Activity	Hours
Attendance at other activities	0,00
Individual or group project	0,00
Independent study and work	0,00
Preparation of lessons	0,00
Preparation for assessment activities	0,00
Resolution of case studies	0,00
Total hours	0,00
