PORTAL INTERUNIVERSITARIO DE

PRODUCCIÓN CIENTÍFICA

The Inter-University Scientific Production Portal is the result of collaboration among Spanish universities. It is established as a national-scale infrastructure through which access is provided to the research outcomes generated within Spanish universities, identifying research groups and the researchers responsible for them. In this way, and through a single access point, it serves as the central hub for research results from Spanish universities and their researchers, offering users various functionalities that facilitate the identification, access, and transfer of research findings.
